**Current surveys.**—Current sample surveys conducted by the Bureau of the Census cover various aspects of the retail and wholesale trade and selected service industries. Its *Monthly Retail Trade Report* contains monthly estimates of sales, inventories, inventory/sales ratios, and sales of organizations operating 11 or more retail stores, for the United States, by kind of business. In addition,

monthly retail sales data for census regions and divisions, large States, metropolitan areas, and cities are included. Annual figures on sales, year-end inventories, and sales/inventory ratios, by kind of business, appear in the *Annual Retail Trade Report*.

Statistics from the Bureau's monthly wholesale trade survey include national estimates of merchant wholesalers' sales, inventories, and stock-sales ratios by major summary groups—durable and nondurable—and selected kinds of business. Merchant wholesalers are those wholesalers who take title to the goods they sell (e.g., jobbers, exporters, importers, major distributors). These data, based on reports submitted by a sample of firms, appear in the *Monthly Wholesale Trade Report*. Annual figures on sales, sales-inventory ratios, and year-end inventories appear in the *Annual Wholesale Trade Report*. The *Service Annual Survey* provides annual estimates of receipts for selected service

kinds of business for the United States as a whole.

For the current sample survey program retail trade coverage is the same as for the census; wholesale trade coverage is limited to merchant wholesalers; and selected services coverage is less inclusive than the census.

Estimates obtained from annual and monthly surveys are based on sample data and are not expected to agree exactly with results that would be obtained from a complete census of all establishments. Data include estimates for sampling units not reporting.

**Statistical reliability.**—For a discussion of statistical collection and estimation, sampling procedures, and measures of statistical reliability applicable to Census Bureau data, see Appendix III.

**Historical statistics.**—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1970*. See Appendix IV.

### No. 1296. Shopping Centers—Number, Gross Leasable Area, and Retail Sales, by Gross Leasable Area: 1986 to 1991

[As of December 31. A shopping center is a group of architecturally unified commercial establishments built on a site which is planned, developed, owned and managed as an operating unit related in its location, size, and type of shops to the trade area that the serves. The unit provides on-site parking in definite relationship to the types and total size of the stores. The data base attempts to include all centers with three or more stores. Estimates are based on a sample of data available on shopping center properties; for details, contact source]

No. 1298. Domestic and International Franchising—Summary: 1980 to 1991

Franchising is a form of marketing or distribution in which a parent company customarily grants an individual or a company the right, or privilege, to do business in a prescribed manner over a certain period of time in a specified place. The parent company is termed the franchisor; the receiver of the privilege the franchisee; and the right, or privilege, the franchise.

# Foreign Commerce and Aid

This section presents data on the flow of goods, services, and capital between the United States and other countries; changes in official reserve assets of the United States; international investments; foreign assistance programs; and import duties.

The Bureau of Economic Analysis publishes current figures on U.S. international transactions and the U.S. international investment position in its monthly *Survey of Current Business*. Statistics for the foreign aid programs are presented by the Agency for International Development (AID) in its annual *U.S. Overseas Loans and Grants and Assistance from International Organizations*; and by the Department of Agriculture in its *Foreign Agricultural Trade of the United States*.

The principal source of merchandise import and export data is the Bureau of the Census. Current data are presented monthly in *U.S. Merchandise Trade*, report series FT 900, and *U.S. Merchandise Trade: Exports, General Imports, and Imports for Consumption*, report series FT 925. The *Bureau of the Census Catalog* and the *Guide to Foreign Trade Statistics* lists the Bureau's monthly and annual reports in this field. In addition, the International Trade Administration and the Bureau of Economic Analysis present summary as well as selected commodity and country data for U.S. foreign trade in the *Overseas Business Reports* and the *Survey of Current Business*, respectively. The merchandise trade data in the latter source include balance of payments adjustments to the Census data. The Treasury Department's *Monthly Treasury Statement of Receipts and Outlays of the United States Government* contains information on import duties.

**International accounts.**—The international transactions tables (Nos. 1314 to 1316) show, for given time periods, the transfer of goods, services, grants, and financial assets and liabilities between the United States and the rest of the world. The international investment position table (No. 1317) presents, for specific dates, the value of U.S. investments

## In Brief

U.S. merchandise trade,	
net balance	-66.2 bil. dol.
Exports, 1991	422 bil. dol.
General imports, 1991	488 bil. dol.
U.S. foreign assistance,	
1990	15.7 bil. dol.

abroad and of foreign investments in the United States. The movement of foreign and U.S. capital as presented in the balance of payments is not the only factor affecting the total value of foreign investments. Among the other factors are changes in the valuation of assets or liabilities, including changes in prices of securities, defaults, expropriations, and write-offs.

Direct investment abroad means the ownership or control, directly or indirectly by one person of 10 percent or more of the voting securities of an incorporated business enterprise or an equivalent interest in an unincorporated business enterprise. Direct investment position is the value of U.S. parents' claims on the equity of, and receivables due from, foreign affiliates, less foreign affiliates' receivables due from their U.S. parents. Income consists of parents' shares in the earnings of their affiliates plus net interest received by parents on intercompany accounts, less withholding taxes on dividends and interest.

**Foreign aid.**—Foreign assistance is divided into three major categories—grants (military supplies and services and other grants), credits, and other assistance (through net accumulation of foreign currency claims from the sale of agricultural commodities). *Grants* are transfers for which no payment is expected (other than a limited percentage of the foreign currency "counterpart" funds generated by the grant), or which at most involve an obligation on the part of the receiver to extend aid to the United States or other countries to achieve a common objective. *Credits* are loan disbursements or transfers under other agreements which give rise to specific obligations to repay,

over a period of years, usually with interest. All known returns to the U.S. Government stemming from grants and credits (reverse grants, returns of grants, and payments of principal) are taken into account in net grants and net credits, but no allowance is made for interest or commissions. *Other assistance* represents the transfer of U.S. farm products in exchange for foreign currencies (plus, since enactment of Public Law 87-128, currency claims from principal and interest collected on credits extended under the farm products program), less the Government's disbursements of the currencies as grants, credits, or for purchases. The net acquisition of currencies represents net transfers of resources to foreign countries under the agricultural programs, in addition to those classified as grants or credits.

The basic instrument for extending military aid to friendly nations has been the Mutual Defense Assistance Program authorized by the Congress in 1949. Prior to 1952, economic and technical aid was authorized in the Foreign Assistance Act of 1948, the 1950 Act for International Development, and other legislation which set up programs for specific countries. In 1952, these economic, technical, and military aid programs were combined under the Mutual Security Act, which in turn was followed by the Foreign Assistance Act passed in 1961. Appropriations to provide military assistance were also made in the Department of Defense Appropriation Act (rather than the Foreign Assistance Appropriation Act) beginning in 1966 for certain countries in Southeast Asia and in other legislation concerning program for specific countries (such as Israel). Figures on activity under the Foreign Assistance Act as reported in the *Foreign Grants and Credits* series differ from data published by AID or its immediate predecessors, due largely to differences in reporting, timing, and treatment of particular items.

**Exports.**—The Bureau of the Census compiles export data primarily from Shipper's Export Declarations required to be filed with customs officials for shipments leaving the United States. They include U.S. exports under mutual security programs and exclude shipments to U.S. Armed Forces for their own use.

The value reported in the export statistics is generally equivalent to a free alongside ship (f.a.s.) value at the U.S. port of export, based on the transaction price, including inland freight, insurance, and other charges incurred in placing the merchandise alongside the carrier at the U.S. port of exportation. This value, as defined, excludes the cost of loading merchandise aboard the exporting carrier and also excludes freight, insurance, and any other charges or transportation and other costs beyond the U.S. port of exportation. The country of destination is defined as the country of ultimate destination or country where the merchandise is to be consumed, further processed, or manufactured, as known to the shipper at the time of exportation. When ultimate destination is not known, the shipment is statistically credited to the last country to which the shipper knows the merchandise will be shipped in the same form as exported.

For certain "low-valued" shipments, the export statistics include estimates based upon selected samples of such shipments. The dollar value of the "low-valued" shipments have varied. For instance, effective January 1987 through September 1989, data are estimated for shipments valued under \$1,501; from October 1989 through December 1989, data are estimated for shipments valued under \$2,501 to all countries.

Effective January 1990, the United States is substituting Canadian import statistics for U.S. exports to Canada. As a result of the data exchange between the U.S. and Canada, the U.S. has adopted the Canadian import exemption level for its export statistics based on shipments to Canada.

Data are estimated for shipments valued under \$2,501 to all countries, except Canada, using factors based on the ratios of low-valued shipments to individual country totals. These shipments represent slightly less than 2.5 percent of the monthly value of U.S. exports to those countries. Data are estimated for shipments reported on Canadian import documents which total less than \$900 (Canadian). Such shipments represent 2 percent of the monthly value of U.S. exports to Canada.

From 1978-1988 exports were based on Schedule B, Statistical Classification of Domestic and Foreign Commodities Exported from the United States. These statistics were retabulated and published using Schedule E, Standard International Trade Classification, Revision 2. Beginning in 1989, Schedule B classifications were based on the Harmonized System and made to coincide with the Standard International Trade Classification, Revision 3. This revision will affect the comparability of most export series beginning with the 1989 data.

**Imports.**—The Bureau of the Census compiles import data from various customs forms required to be filed with customs officials. From 1974-1981, data on import values were presented on three bases: The transaction values f.a.s. (free alongside ship) at the foreign port of export, the c.i.f. (cost, insurance, and freight), and the previously reported customs import value (as appraised by the U.S. Customs Service in accordance with legal requirements of the Tariff Act of 1930, as amended). This latter valuation, primarily used for collection of import duties, frequently did not reflect the actual transaction value. Beginning 1982, import data are based on customs values, i.e., the price paid by the buyer to the seller in accordance with the 1979 Trade Agreement Act amendments to the 1930 Tariff Act. For the c.i.f. imports, the new customs value was substituted for the arms-length transaction value used for 1981 and earlier years. The f.a.s. transaction values were discontinued as of January 1982. Country of origin is defined as country where the merchandise was grown, mined, or manufactured. If country of origin is unknown, country of shipment is reported.

Imports are classified either as "General imports" or "Imports for consumption." General imports are a combination of entries for immediate consumption, entries into customs bonded warehouses, and entries into U.S. Foreign Trade Zones, thus generally reflecting total arrivals of merchandise. Imports for consumption are a

combination of entries for immediate consumption, withdrawals from warehouses for consumption, and entries of merchandise into U.S. customs territory from U.S. Foreign Trade Zones, thus generally reflecting the total of the commodities entered into U.S. consumption channels.

Since July 1953, the import statistics include estimates, not classified by commodity, for certain low-valued shipments. For instance, from January 1985 through September 1989, import statistics include estimates for shipments valued under \$1,001. Effective October 1989, import statistics are fully compiled on shipments valued over \$1,250 or, under certain textile programs, for any article which must be reported on a formal entry. Value data for shipments valued under \$1,251 and not required to be reported on formal entries are estimated for individual countries using factors based on the ratios of low-valued shipments to individual country totals for past periods. The estimated low-valued shipments generally amount to slightly less than 4 percent of the import total.

From 1978-1988, imports were based on the Tariff Schedule of the United States Annotated. The statistics were retabulated and published using Schedule A, Standard International Trade Classification, Revision 2. Beginning in 1989, the statistics are based on the Harmonized Tariff Schedule of the United States, which coincides with the Standard International Trade Classification, Revision 3. This revision will affect the comparability of most import series beginning with the 1989 data.

**Area coverage.**—Except as noted, the geographic area covered by the export and import trade statistics is the United States Customs area (includes the 50 States, the District of Columbia and Puerto Rico), the U.S. Virgin Islands (effective January 1981), and U.S. Foreign Trade Zones (effective July 1982). Data for selected tables and total values for 1980, have been revised to reflect the U.S. Virgin Islands' trade with foreign countries, where possible.

No. 1314. U.S. International Transactions, by Type of Transaction: 1980 to 1991

### No. 1322. U.S. Businesses Acquired or Established by Foreign Direct Investors, by Industry of U.S. Business Enterprise: 1989 and 1990

[Foreign direct investment is the ownership or control, directly or indirectly, by one foreign individual branch, partnership, association, trust, corporation, or government of 10 percent or more of the voting securities of a U.S. business enterprise or an equivalent interest in an unincorporated one. Data represent number and full cost of acquisitions of existing U.S. business enterprises, including business segments or operating units of existing U.S. business enterprises and establishments of new enterprises. Investments may be made by the foreign direct investor itself, or indirectly by an existing U.S. affiliate of the foreign direct investor. Covers investments in U.S. business enterprises with assets of over \$1 million, or ownership of 200 acres of U.S. land]

## No. 1324. U.S. Investment Position Abroad, by Country: 1980 to 1990

[In millions of dollars. Direct investments represent private enterprises in one country owned or controlled by investors in another country or in the management of which foreign investors have an important role. Negative position occurs when U.S. parent company's liabilities to the foreign affiliate are greater than its equity in, and loans to the foreign affiliate. See also *Historical Statistics, Colonial Times to 1970*, series U 41-46]

## No. 1325. U.S. Government Foreign Grants and Credits: 1946 to 1990—Continued

[In millions of dollars. See headnote, p. 790]

PROGRAM	1946- 1955, total	1956- 1965, total	1966- 1975, total	1976- 1985, total	1986	1987	1988	1989	1990, prel.
Other assistance (through net accumulation of foreign currency claims) <sup>10</sup>	541	2,802	-1,290	-287	5	-27	-36	-2	-34
Developed countries <sup>9</sup>	190	330	-203	-56	-3	-38	-26	-17	-7
Developing countries <sup>2</sup>	351	2,472	-1,086	-231	8	11	-10	14	-26
Currency claims acquired	813	11,498	6,888	1,227	134	84	82	66	76
Sales of farm products	813	11,170	3,013	114	49	41	35	25	13
Second-stage operations <sup>11</sup>	-	329	3,875	1,113	85	43	46	42	63
<i>Less: Currencies disbursed</i>	<i>272</i>	<i>8,696</i>	<i>8,177</i>	<i>1,514</i>	<i>129</i>	<i>111</i>	<i>118</i>	<i>68</i>	<i>109</i>
Economic grants and credits to purchasing country	182	6,863	6,238	180	10	15	16	10	37
Other uses	90	1,833	1,940	1,334	119	96	101	58	72

- Represents zero. Z Less than \$500,000. <sup>1</sup> For details, see table 1326. <sup>2</sup> Developed countries include Australia, Canada, Japan, New Zealand, South Africa, all countries listed under "Western Europe" in table 1326, except Portugal, Spain (through 1981), Yugoslavia, and Malta, and all countries listed under "Eastern Europe" in table 1326. Developing countries include all other countries listed in table 1326 (including Spain through 1981). <sup>3</sup> Foreign Assistance Act of 1961 (P.L. 87-195), as amended. Also includes predecessor and related programs. <sup>4</sup> Includes military assistance under Dept. of Defense Appropriation Act, 1966 (P.L. 89-394) and later acts. <sup>5</sup> Includes funds made available under Public Law 93-199 and subsequent legislation to release Israel from its contractual liability to pay for defense articles and services purchased under other legislation. <sup>6</sup> Net new grants are not adjusted for settlements for postwar relief and other grants under agreements, and net new credits exclude prior grants converted into credits, which were as follows: 1946-55, \$1,463 million; 1956-65, \$491 million; 1972, \$994 million. Repayments on these settlements are included in net new credits. <sup>7</sup> Agricultural Trade Development and Assistance Act. <sup>8</sup> Outstanding credits on Dec. 31, 1990, totaled \$60,650 million representing net credits extended since organization of Export-Import Bank, Feb. 12, 1934, less chargeoffs and net adjustments due to exchange rates (\$2,055 million), and excluding World War I debts. The amount repayable in dollars at U.S. Government option was \$59,325 million; the remainder was repayable in foreign currencies, commodities, or services, at the option of the borrowers. <sup>9</sup> Commodity Credit Corporation Charter Act. <sup>10</sup> Equivalent value of currencies still available to be used, including some funds advanced from foreign governments and after loss by exchange rate fluctuation (\$1,592 million), was \$44 million on Dec. 31, 1990. <sup>11</sup> Includes foreign currencies acquired from triangular trade operations and principal and interest collections on credits, originally extended under P.L. 83-480, which—since enactment of P.L. 87-128—are available for the same purposes as P.L. 83-480 currencies.

No. 1327. U.S. Foreign Economic and Military Aid Programs: 1946 to 1990

[In millions of dollars. For years ending June 30 except, beginning 1977, ending Sept. 30. Economic aid shown here represents U.S. economic aid-not just aid under Foreign Assistance Act. Major components in recent years include AID, Food for Peace, Peace Corps, and paid-in subscriptions to international financial institutions, such as IBRD, and IDB. Cumulative totals for 1946-1990 are true totals net of deobligation; annual figures however, are gross unadjusted program figures. Military aid includes Military Assistance Program (MAP) grants, foreign military credit sales, service-funded programs, and excess defense articles]

## No. 1330. U.S. Exports and Imports of Merchandise: 1970 to 1991

[In billions of dollars, except percent. Includes silver ore and bullion; beginning 1974, includes shipments of nonmonetary gold. Data may differ from those shown in other tables due to revisions and inclusion of the Virgin Islands since 1974. For basis of dollar values, see text, section 29. See also *Historical Statistics, Colonial Times to 1970*, series U 190-195 and U 207-212]

Z Less than \$50 million. <sup>1</sup> Totals shown for exports reflect the value of estimated parcel post and Special Category shipments, and beginning 1987, adjustments for undocumented exports to Canada which are not distributed by coastal area/customs district. Beginning 1985, the value of bituminous coal exported through Norfolk, VA; Charleston, SC; and Mobile, AL is reflected in the total but not distributed by district. Total bituminous coal exports for the 3 customs districts were valued at \$2.3 billion in 1984, \$2.6 billion in 1985, \$2.3 billion in 1986, \$1.9 billion in 1987, and \$2.4 billion in 1988. <sup>2</sup> Beginning 1985, excludes exports of bituminous coal. <sup>3</sup> Includes estimated shipments and vessel-own power.

- Represents zero. <sup>1</sup> Imports are on a customs value basis. Exports are f.a.s. value. <sup>2</sup> Includes revisions not carried to area values; therefore, area values will not add to total. <sup>3</sup> Effective October 3, 1990, East Germany ceased to exist as a sovereign state and became a part of West Germany. Accordingly, trade statistics for East Germany reflect trade for January through September 1990. Trade statistics for 1990 for former West Germany reflect this unification beginning with October 1990. Data for Germany reflect the consolidation of the two countries for 1991.

# Outlying Areas

This section presents summary economic and social statistics for Puerto Rico, Virgin Islands, Guam, American Samoa, and the Northern Mariana Islands.

Primary sources are the decennial censuses of population and housing, and the censuses of agriculture, business, manufactures, and construction (taken every 5 years) conducted by the Bureau of the Census; the annual *Vital Statistics of the United States*, issued by the National Center for Health Statistics; and the annual *Income and Product* of the Puerto Rico Planning Board, San Juan.

**Jurisdiction.**—The United States gained jurisdiction over these areas as follows:

The islands of *Puerto Rico* and *Guam*, surrendered by Spain to the United States in October 1898, were ceded to the United States by the Treaty of Paris, ratified in 1899. Puerto Rico became a Commonwealth on July 25, 1952, thereby achieving a high degree of local autonomy under its own constitution. The *Virgin Islands*, comprising 50 islands and cays, was purchased by the United States from Denmark in 1917. *American Samoa*, a group of seven islands, was acquired by the United States in accordance with a convention among the United States, Great Britain, and Germany, ratified in 1900 (Swains Island was annexed in 1925).

By an agreement approved by the Security Council and the United States, the Northern Mariana Islands, previously under Japanese mandate, was administered by the United States between 1947 and 1986 under the United Nations trusteeship system. The Northern Mariana Islands became a Commonwealth in 1986.

For a brief summary of U.S. territorial development, see table 341.

**Censuses.**—Because characteristics of the outlying areas differ, the presentation of census data for them is not uniform. The 1960 Census of Population covered

## In Brief

Persons per household, 1990:

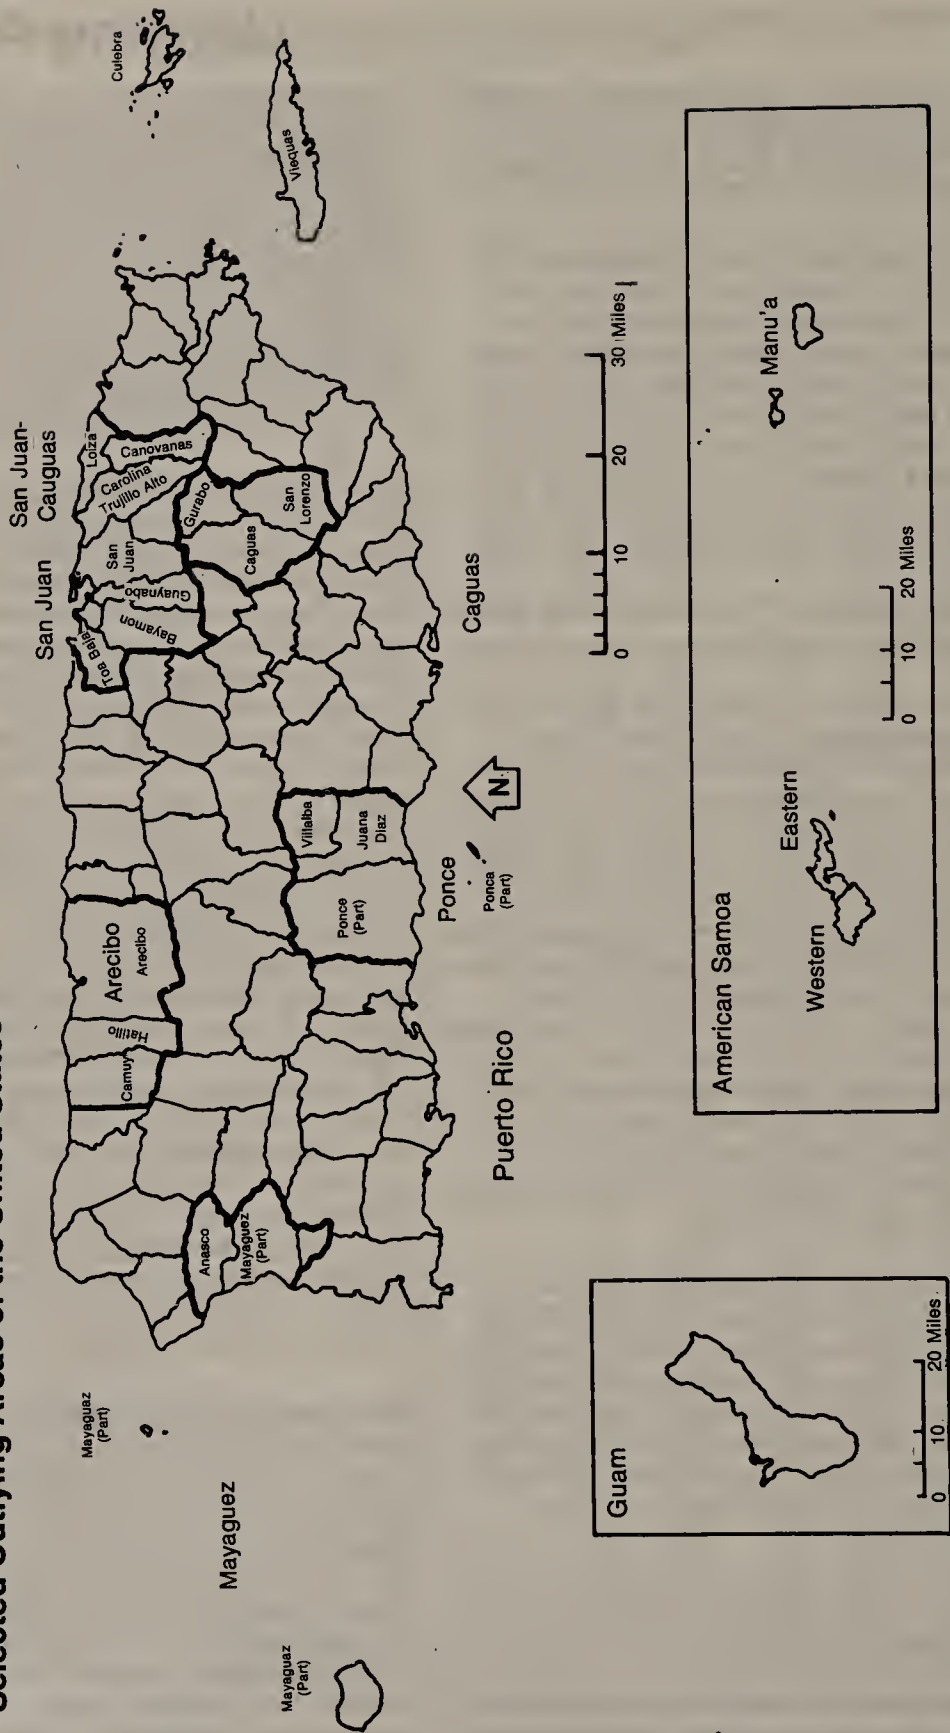

<i>Puerto Rico</i>	3.3
<i>Virgin Islands</i>	3.1
<i>Guam</i>	4.0
<i>American Samoa</i>	7.0
<i>Northern Mariana Islands</i>	4.6

all of the places listed above except the Northern Mariana Islands (their census was conducted in April 1958 by the Office of the High Commissioner), while the 1960 Census of Housing also excluded American Samoa. The 1970, 1980 and 1990 Censuses of Population and Housing covered all five areas. The 1959, 1969, and 1978 Censuses of Agriculture covered Puerto Rico, American Samoa, Guam, and the Virgin Islands; the 1964, 1974, and 1982 censuses covered the same areas except American Samoa; and the 1969, 1978, and 1987 censuses included the Northern Mariana Islands. Beginning in 1967, Congress authorized the economic censuses, to be taken at 5-year intervals, for years ending in "2" and "7." Prior economic censuses were conducted in Puerto Rico for 1949, 1954, 1958, and 1963 and in Guam and the Virgin Islands for 1958 and 1963. In 1967, the census of construction industries was added for the first time in Puerto Rico; in 1972, Virgin Islands and Guam were covered. For 1982 and 1987, the economic censuses covered the Northern Mariana Islands.

**Information in other sections.**—In addition to the statistics presented in this section, other data are included as integral parts of many tables showing distribution by States in various sections of the *Abstract*. See "Outlying areas of the United States" in the index. For definition and explanation of terms used, see section 1, Population; section 4, Education; section 23, Agriculture; section 26, Construction and Housing; section 27, Manufactures; and section 28, Domestic Trade and Services.

Figure 30.1  
Selected Outlying Areas of the United States

**No. 1339. Estimated Resident Population, by Area: 1950 to 1990**

[In thousands. As of July 1, except 1990, as of April 1. Includes estimates of Armed Forces stationed in area]

AREA	1950	1960	1970	1975	1980	1985	1987	1988	1990
Puerto Rico . . . . .	2,218	2,362	2,716	2,933	3,206	3,282	3,292	3,291	3,522

Guam . . . . .	60	66	86	102	107	124	130	133	133
Virgin Islands . . . . .	27	32	63	94	98	111	106	103	102
Northern Mariana Islands <sup>1</sup> . . . . .	(NA)	(NA)	12	15	17	19	20	21	43

NA Not available. <sup>1</sup> Data consistent with apportionment census of September 1973 which showed a total population of 14,333 for the Marianas.

Source: U.S. Bureau of the Census, 1950-1988: *Current Population Reports*, series P-25, Nos. 80, 336, 943, and 1049; 1990: press releases, CB91-142, 242, 276, 263, and 243.

**No. 1340. Estimates of Components of Population Change, by Area: 1970 to 1980 and 1980 to 1988**

[In thousands, except percent. Resident population, including Armed Forces stationed in area. See table 1341 for population totals. Minus sign (-) indicates decrease. For explanation of methodology, see source]

AREA	APRIL 1, 1970 to APRIL 1, 1980					APRIL 1, 1980 to JULY 1, 1988				
	Net change		Births	Deaths	Net migration	Net change		Births	Deaths	Net migration <sup>1</sup>
	Number	Percent				Number	Percent			
Puerto Rico . . . . .	484.5	17.9	744.0	193.7	-65.9	95.0	3.0	546.0	185.0	-267.0
American Samoa . . . . .	5.1	18.9	10.6	1.4	-4.1	7.2	22.4	11.2	1.3	-2.7
Guam . . . . .	21.0	24.7	30.7	4.1	-5.7	27.0	25.5	25.9	3.7	4.9
Virgin Islands . . . . .	34.1	54.6	26.6	5.0	12.5	6.6	6.9	20.1	4.4	-9.0
Northern Mariana Islands <sup>2</sup> . . . . .	4.6	37.5	5.3	0.9	( <sup>3</sup> )	4.4	26.1	5.9	0.9	( <sup>3</sup> )

<sup>1</sup> Includes error of closure (the amount necessary to make the components of change add to the net change between censuses). <sup>2</sup> See footnote 1, table 1339. <sup>3</sup> Migration is derived as a residual. Because part of the residual migration in these areas reflects under-registration of vital statistics, migration figures are not shown.

# Comparative International Statistics

This section presents statistics for the world as a whole and for many countries on a comparative basis with the United States. Selected data are shown for area and population, births and deaths, social and industrial indicators, finances, agriculture, communication, and military affairs.

Statistics of the individual nations may be found primarily in official national publications, generally in the form of yearbooks, issued by most of the nations at various intervals in their own national languages and expressed in their own or customary units of measure. (For a listing of selected publications, see Guide to Sources.) For handier reference, especially for international comparisons, the Statistical Office of the United Nations compiles data as submitted by member countries and issues a number of international summary publications, generally in English and French. Among these are the *Statistical Yearbook*; the *Demographic Yearbook*; the *Yearbook of International Trade Statistics*; the *Yearbook of National Accounts Statistics: Vol. II, International Tables*; *Population and Vital Statistics Reports* (quarterly); the *Monthly Bulletin of Statistics*; and the *Energy Statistics Yearbook*. Specialized agencies of the United Nations also issue international summary publications on agricultural, labor, health, and education statistics. Among these are the *Production Yearbook* and *Trade Yearbook* issued by the Food and Agriculture Organization, the *Yearbook of Labour Statistics* issued by the International Labour Office, the *World Health Statistics* issued by the World Health Organization, and the *Statistical Yearbook* issued by the Educational, Scientific, and Cultural Organization.

The Bureau of the Census, in *Country Demographic Profiles*, series ISP-DP, presents data on individual countries for both a recent census year and the current period; and in the *World Population Profile* series, estimates of basic demographic measures for countries and regions of the world. The *International Population Statistics Reports*, series P-90

## In Brief

Ten largest countries in 1991:

China, Mainland	1,151,487
India	869,515
Soviet Union (former)	293,048
United States	252,502
Indonesia	193,560
Brazil	155,356
Japan	124,017
Nigeria	122,471
Pakistan	117,490
Bangladesh	116,601

and P-91, issued by the Bureau of the Census, also present population figures for many foreign countries. Detailed population statistics are also available from the Bureau of the Census' computerized International Data Base.

The U.S. Arms Control and Disarmament Agency and the International Monetary Fund (IMF) also compile data on international statistics. In its *World Military Expenditures and Arms Transfers*, published annually, the ACDA presents data on various economic indicators, as well as basic military data. Among the topics presented have been military expenditures, gross national product, imports and exports, and armed forces, by region and/or country. The IMF publishes a series of reports relating to financial data. These include *International Financial Statistics*, *Direction of Trade*, and *Balance of Payments Yearbook*, published in English, French, and Spanish.

**Statistical coverage, country names, and classifications.**—Problems of space and availability of data limit the number of countries and the extent of statistical coverage shown. The list of countries included is based almost entirely on a list of sovereign nations, dependencies, and areas of special sovereignty published by the U.S. Department of State in *Status of the World's Nations*. Country names are shown here as specified in that publication. In the few cases where a lack of comparability exists between State Department and

United Nations' terminology, the State Department's preferences are used.

In 1990 and 1991, several important changes took place in the status of the world's nations. Two nations, Yemen and Germany, were formed in 1990, each by unification of two formerly separate nations. In the case of Germany, the former German Democratic Republic (East) was subsumed by the Federal Republic of Germany (West). In most cases, data presented in the *Statistical Abstract* are for former West Germany. The Republic of Yemen was formed by union of the former Yemen Arab Republic and the People's Democratic Republic of Yemen. Also in 1990, Namibia finally realized its independence; the United Nations terminated its status as a South African mandate in 1966.

The year 1990 also began a period of turmoil in the former Soviet Union. The independence of three Baltic States—Estonia, Latvia, and Lithuania—was recognized by the central Soviet government in August 1991. The United States established diplomatic relations with the democratically elected governments of the Baltic States in September 1991. In December 1991, the 12 former Soviet republics became separate sovereign nations—Armenia, Azerbaijan, Byelarus, Georgia, Kazakhstan, Kyrgyzstan, Moldova, Russia, Tajikistan, Turkmenistan, Ukraine, and Uzbekistan. Eleven of the 12 have formed a Commonwealth of Independent States (Georgia has not joined). Data presented in the *Statistical Abstract* are for former Soviet Union.

The population estimates and projections used in tables 1459-1461 were prepared by the Census Bureau. For each country, the data on population, by age and sex, fertility, mortality, and international migration were evaluated and, where necessary, adjusted for inconsistencies and errors in the data. In most instances, comprehensive projections were made by the component method, resulting in distributions of the population by age and sex, and requiring an assessment of probable future trends of fertility, mortality, and international migration.

**Economic associations.**—The Organization for European Economic Co-operation (OEEC), a regional grouping of

Western European countries established in 1948 for the purpose of harmonizing national economic policies and conditions, was succeeded on September 30, 1961, by the Organization for Economic Cooperation and Development (OECD). The member nations of the OECD are Australia, Austria, Belgium, Canada, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Japan, Luxembourg, the Netherlands, New Zealand, Norway, Portugal, Spain, Sweden, Switzerland, Turkey, the United Kingdom, and the United States, plus Yugoslavia in special status category.

**Quality and comparability of the data.**—The quality and comparability of the data presented here are affected by a number of factors:

- (1) The year for which data are presented may not be the same for all subjects for a particular country, or for a given subject for different countries, though the data shown are the most recent available. All such variations have been noted. The data shown are for calendar years except as otherwise specified.
- (2) The bases, methods of estimating, methods of data collection, extent of coverage, precision of definition, scope of territory, and margins of error may vary for different items within a particular country, and for like items for different countries. Footnotes and headnotes to the tables give a few of the major time-period and coverage qualifications attached to the figures; considerably more detail is presented in the source publications. Many of the measures shown are, at best, merely rough indicators of magnitude.
- (3) Figures shown in this section for the United States may not always agree with figures shown in the preceding sections. Disagreements may be attributable to the use of differing original sources, a difference in the definition of geographic limits (the 50 States, conterminous United States only, or the United States including certain outlying areas and possessions), or to possible adjustments made in the U.S. figures by the United Nations or other sources in order to make them more

comparable with figures from other countries.

**International comparisons of national accounts data.**—In order to compare national accounts data for different countries, it is necessary to convert each country's data into a common unit of currency, usually the U.S. dollar. The market exchange rates which are often used in converting national currencies do not necessarily reflect the relative purchasing power in the various countries. For example, using table 1370, it should not be concluded that the United Kingdom's individual standard of living in 1990 was only 78 percent of that of the United States, as the statistics may imply. It is obviously necessary that the goods and services produced in different countries should be valued consistently if the differences observed are meant to reflect real differences in the volumes of goods and services produced. The use of purchasing power parities (see table 1375) instead of exchange rates is intended to achieve this objective.

The method used to present the data shown in table 1375 is to construct volume measures directly by revaluing the goods and services sold in different countries at a common set of international prices. By dividing the ratio of the gross domestic products of two countries expressed in their own national currencies by the corresponding ratio calculated at constant international prices, it is possible to derive the implied purchasing power parity (PPP) between the two currencies concerned. PPP's show how many units of currency are needed in

one country to buy the same amount of goods and services which one unit of currency will buy in the other country. For further information, see *National Accounts, Main Aggregates*, volume I, issued annually by the Organization for Economic Cooperation and Development, Paris, France.

**International Standard Industrial Classification.**—The original version of the International Standard Industrial Classification of All Economic Activities (ISIC) was adopted in 1948. Wide use has been made both nationally and internationally in classifying data according to kind of economic activity in the fields of production, employment, national income, and other economic statistics. A number of countries have utilized the ISIC as the basis for devising their industrial classification scheme. Substantial comparability has been attained between the industrial classifications of many other countries, including the United States, and the ISIC by ensuring, as far as practicable, that the categories at detailed levels of classification in national schemes fitted into only one category of the ISIC. For more detail, see Bureau of the Census, *The International Standard Industrial Classification and the U.S. Standard Industrial Classification*, Technical Paper No. 14 and text, section 27. The United Nations, the International Labour Organization, the Food and Agriculture Organization, and other international bodies have utilized the ISIC in publishing and analyzing statistical data. Revisions of the ISIC were issued in 1958, 1968, and 1989.

1990 . . . . .	100	54	31	23	6	35	4

NA Not available. <sup>1</sup> May include unmarried cohabitating couples. Such couples are explicitly included under married couples in Canada (beginning in 1981) and France. For Sweden, beginning in 1980, all cohabitants are included as married couples, and the figures for 1970 have been adjusted to include all cohabitants. For Denmark, from 1983 onward, persons reported separately as living in consensual unions with joint children have been classified here as married couples. In other countries, some unmarried cohabitants are included as married couples, while some are classified under "other households", depending on responses to surveys and censuses. <sup>2</sup> Children are defined as unmarried children living at home according to the following age limits: Under 18 years old in the United States, Canada, Japan, Denmark, and the United Kingdom, except that the United Kingdom includes 16- and 17-year-olds only if they are in full-time education; under 25 years old in France; under 16 years old in Sweden; and children of all ages in the Netherlands and Germany. <sup>3</sup> Includes both family and nonfamily households not elsewhere classified. These households comprise, for example, siblings residing together, other households composed of relatives, and households made up of roommates. Some unmarried cohabitating couples may also be included in the "other" group. See footnote 1. <sup>4</sup> Estimated by the U.S. Bureau of Labor Statistics. <sup>5</sup> From family-based statistics. However, one person living alone constitutes a family in Denmark. In this respect, the Danish data are closer to household statistics. <sup>6</sup> Great Britain only (excludes Northern Ireland). <sup>7</sup> Formerly West Germany (prior to unification).

### No. 1369. Proficiency Test Scores in Mathematics and Science for 13-Year-Old Students, by Selected Countries: 1991

[Based on the average scores of students participating in the second International Assessment of Educational Progress (IAEP), conducted in 1991 by the Educational Testing Service. The IAEP is an international comparative study of the mathematics and science skills of samples of 9- and 13-year-old students from 20 countries. The IAEP was designed to collect and report data on what students know and can do, on the educational and cultural factors associated with achievement, and on students' attitudes, backgrounds, and classroom experiences; for detail, see source]

AREA	Average days of instruction in year	MATHEMATICS <sup>1</sup>					SCIENCE <sup>2</sup>				
		Rank	Percent correct	Average minutes of mathematics instruction each week	Percent of students who spend 2 hours or more on homework per day	Percent of students who watch television 5 hours or more per day	Rank	Percent correct	Average minutes of science instruction each week	Percent of students who spend 2 hours or more on homework per day	Percent of students who watch television 5 hours or more per day

### No. 1370. Organization for Economic Cooperation and Development (OECD)—Gross National Product: 1980 to 1990

[For interpretation of the absolute levels of GNP and per capita GNP, the market exchange rates used in converting national currencies do not necessarily reflect the relative purchasing power in the various countries. As a consequence, it should not be concluded, for instance, that the United Kingdom's individual standard of living in 1990 was only 78 percent of that of the United States, as the statistics may imply. Minus sign (-) indicates decrease. For explanation of annual percent change, see Guide to Tabular Presentation]

### No. 1374. Selected International Economic Indicators: 1970 to 1989

[Data cover gross national product (GNP) at market prices, except for France, Italy, and the United Kingdom, which relate to gross domestic product. Gross fixed capital formation covers private and government sectors except military. Savings data are calculated by deducting outlays—such as personal consumption expenditures, interest paid, and transfer payments to foreigners—from disposable personal income. Minus sign (-) indicates decline]

YEAR	United States	France	West Germany	Italy	Netherlands	United Kingdom	Japan	Canada
GNP growth rates <sup>1</sup> (constant 1982 prices):								
1970 . . . . .	-0.3	5.7	-0.5	5.3	5.4	2.3	10.8	2.5
1980 . . . . .	-0.2	1.6	1.5	4.2	0.8	-2.2	4.3	1.5
1984 . . . . .	6.8	1.3	3.3	3.0	3.2	2.1	5.1	6.1
1985 . . . . .	3.4	1.9	1.9	2.6	2.6	3.6	4.9	4.8
1986 . . . . .	2.7	2.5	2.3	2.5	2.0	3.9	2.5	3.1
1987 . . . . .	3.4	2.2	1.6	3.0	1.1	4.7	4.6	4.4
1988 . . . . .	4.5	3.8	3.7	4.2	2.8	4.6	5.7	4.2
1989 . . . . .	2.5	3.6	3.9	3.2	3.5	2.2	4.9	2.7
Ratio of gross fixed capital formation to GNP (current prices):								
1970 . . . . .	17.7	24.3	25.4	24.5	27.2	18.7	35.6	21.7

### No. 1375. Gross Domestic Product, Total and Per Capita, Using Purchasing Power Parities—Selected Countries: 1970 to 1989

[The goods and services produced in different countries should be valued consistently if the differences observed are meant to reflect real differences in the volumes of goods and services produced. The use of purchasing power parities (PPP) instead of exchange rates is intended to achieve this objective. PPP's show how many units of currency are needed in one country to buy the same amount of goods and services which one unit of currency will buy in the other country. For further explanation of PPP, see text, section 31]

### No. 1392. Indexes of Hourly Compensation Costs for Production Workers in Manufacturing—Selected Countries: 1980 to 1990

[United States=100. Compensation costs include pay for time worked, other direct pay, employer expenditures for legally required insurance programs and contractual and private benefit plans, and for some countries, other labor taxes. Data adjusted for exchange rates. Area averages are trade-weighted to account for difference in countries' relative importance to U.S. trade in manufactured goods. The trade weights used are the sum of U.S. imports of manufactured products for consumption (customs value) and U.S. domestic exports of manufactured products (f.a.s. value) in 1986; see source for detail]

## No. 1396. World Production of Major Mineral Commodities, by Selected Commodity: 1985 to 1989

COUNTRY	Unit	1985	1987	1988, prel.	1989, est.	Leading producers, 1989
<b>MINERAL FUELS</b>						
Coal	Mil. metric tons	4,444	4,691	4,814	4,883	China: Mainland, U.S., Soviet Union
Gas, natural, marketed	Tril. cu. ft.	61.5	65.9	68.8	71.3	Soviet Union, U.S., Canada
Natural gas liquids <sup>1</sup>	Mil. barrels <sup>2</sup>	1,532	1,650	1,663	1,695	U.S., Soviet Union, Saudi Arabia
Petroleum, crude	Mil. barrels <sup>2</sup>	19,664	20,652	21,260	21,915	Soviet Union, U.S., Saudi Arabia
Petroleum, refined	Mil. barrels <sup>2</sup>	21,114	22,148	22,626	22,812	U.S., Soviet Union, Japan
<b>NONMETALLIC MINERALS</b>						
Cement, hydraulic	Mil. metric tons	960	1,048	1,105	1,123	China: Mainland, Soviet Union, Japan
Diamond, gem and industrial <sup>1</sup>	1,000 carats	66,018	87,603	93,346	94,837	Australia, Zaire, Botswana
Nitrogen in ammonia	Mil. metric tons	91.1	94.1	98.5	99.6	Soviet Union, China: Mainland, U.S.
Phosphate rock	Mil. metric tons	149	144	160	162	U.S., Soviet Union, Morocco
Potash, marketable	Mil. metric tons	29.2	30.5	32.1	29.8	U.S., Canada, East Germany
Salt	Mil. metric tons	173	179	184	191	U.S., China: Mainland, Soviet Union
Sulfur, elemental basis	Mil. metric tons	53.8	56.1	58.1	58.3	U.S., Soviet Union, Canada
<b>METALS</b>						
Aluminum <sup>3</sup>	Mil. metric tons	15.4	16.4	17.6	18.0	U.S., Soviet Union, Canada
Bauxite, gross weight	Mil. metric tons	85.3	92.8	99.1	106.1	Australia, Guinea, Jamaica
Chromite, gross weight <sup>1</sup>	1,000 metric tons	10,945	11,355	12,167	11,901	South Africa, Soviet Union, India
Copper, metal content <sup>4</sup>	1,000 metric tons	7,989	8,306	8,537	8,887	Chile, U.S., Canada
Gold, metal content	Mil. troy ounces	47.6	51.6	58.4	61.3	South Africa, Soviet Union, U.S.
Iron ore, gross weight <sup>5</sup>	Mil. metric tons	861	889	906	924	Soviet Union, Brazil, Australia
Lead, metal content <sup>4</sup>	1,000 metric tons	3,439	3,429	3,414	3,395	Australia, Soviet Union, U.S.
Manganese ore, gross weight	Mil. metric tons	25.3	23.7	23.9	24.0	Soviet Union, S. Africa, China: Mainland
Nickel, metal content <sup>4</sup>	1,000 metric tons	812	826	872	932	Canada, Soviet Union, New Caledonia
Steel, crude	Mil. metric tons	718	733	778	784	Soviet Union, Japan, U.S.
Tin, metal content <sup>4</sup>	1,000 metric tons	181	178	200	216	Brazil, Indonesia, Malaysia
Zinc, metal content <sup>4</sup>	1,000 metric tons	6,758	7,232	7,015	7,062	Canada, Soviet Union, Australia

<sup>1</sup> Excludes China: Mainland. <sup>2</sup> 42-gallon barrels. <sup>3</sup> Unalloyed ingot metal. <sup>4</sup> Mine output. <sup>5</sup> Includes iron ore concentrates and iron ore agglomerates.

### No. 1408. Central Bank Discount Rates, Money Market Rates, and Government Bond Yields—Selected Countries: 1980 to 1992

[In percent per annum. Central bank discount rates refer to the rate at which the monetary authority lends or discounts eligible paper for deposit money banks. Money market rates refer to the rate at which short-term borrowings are effected between financial institutions. Government bond yields refer to one or more series representing average yields to maturity of government bonds or other bonds that would be indicative of longer term rates]

# No. 1410. Total External Public Debt, 1980 to 1990, and by Type of Creditor, 1990, and Debt Service Payments and Ratio, 1980 to 1990

[External public debt is defined as debt repayable to external creditors in foreign currency, goods, or services, with an original or extended maturity of more than one year, which is a direct obligation of, or has repayment guaranteed by, a public body in the borrowing country. Excludes undisbursed debt (amounts not yet drawn by recipient) and unguaranteed private debt, which for some countries is substantial. Debt contracted for the purchase of military equipment is not usually reported. Debt service payments represent the sum of interest payments and repayments of principal on external public debt]

### No. 1411. Net Flow of Financial Resources to Developing Countries, by Origin and Type of Resource: 1970 to 1990

[In billions of U.S. dollars. Net flow covers loans, grants, and grant-like flows minus amortization on loans. Military flows are excluded. Developing countries cover countries designated by Development Assistance Committee as developing. Official development assistance covers all flows to developing countries and multilateral institutions provided by official agencies, including State and local governments, or by their executive agencies, which are administered with the promotion of economic development and welfare of developing countries as their main objective and whose financial terms are intended to be concessional in character with grant element of at least 25 percent. Other official flows cover export credits and portfolio investment from the official sector]

## No. 1413. Military Expenditures in Current and Constant (1989) Dollars: 1980 to 1989

[In millions of dollars, except as indicated. See also table 532. For most countries, data for expenditures and for GNP were based on local currencies which were deflated to constant 1989 local currency values before conversion to U.S. dollar equivalents. In general, the rates used for conversion are the 1989 average par/market exchange rates as supplied by the International Bank for Reconstruction and Development.]

# Guide to—Sources of Statistics, State Statistical Abstracts, and Foreign Statistical Abstracts

Alphabetically arranged by subject, this guide contains references to the important primary sources of statistical information for the United States. Secondary sources have been included if the information contained in them is presented in a particularly convenient form or if primary sources are not readily available. Nonrecurrent publications presenting compilations or estimates for years later than 1980 or types of data not available in regular series are also included.

Much valuable information may also be found in State reports (see pp. 901–905) and foreign statistical abstracts (see pp. 906 and 907) and in reports for particular commodities, industries, or similar segments of our economic and social structures, many of which are not included here.

Publications listed under each subject are divided into two main groups: “U.S. Government” and “Other.” The location of the publisher of each report is given except for Federal agencies located in Washington, DC. Most Federal publications may be purchased from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, tel. 202-783-3238, or from Government Printing Office bookstores in certain major cities. In some cases, Federal publications may be obtained from the issuing agency.

Major reports, such as the Census of Population, which consist of many volumes, are listed by their general, all-inclusive titles.

## Bureau of the Census Publications

In most cases, separate reports of the most recent censuses are available for each State, subject, industry, etc. Complete information on publications of all the censuses and current surveys conducted by the Bureau of the Census appears in the *Bureau of the Census Catalog*, published annually and available from the Superintendent of Documents.

## Guide to State Statistical Abstracts

This bibliography includes the most recent statistical abstracts for States and Puerto Rico published since 1980 plus those that will be issued in late 1992 or early 1993. For some States, a near equivalent has been listed in substitution for, or in addition to, a statistical abstract. All sources contain statistical tables on a variety of subjects for the State as a whole, its component parts, or both. The page counts given for publications are approximate.

### Alabama

University of Alabama, Center for Business and Economic Research, P.O. Box 870221, Tuscaloosa 35487 205-348-6191

## Guide to Foreign Statistical Abstracts

This bibliography presents recent statistical abstracts for Mexico, the Soviet Union, and member nations of the Organization for Economic Cooperation and Development. All sources contain statistical tables on a variety of subjects for the individual countries. Many of the following publications provide text in English as well as in the national language(s). For further information on these publications, contact the named statistical agency which is responsible for editing the publication.

### Austria

# Metropolitan Area Concepts and Components

Statistics for metropolitan areas shown in the *Statistical Abstract* represent areas designated by the U.S. Office of Management and Budget (OMB) as standard metropolitan statistical areas (SMSA's) or metropolitan statistical areas (MSA's). Effective June 30, 1983, OMB changed the basic term from SMSA to MSA and revised the geographic definitions of many individual metropolitan areas; some new areas were defined, and some areas were redesignated as PMSA's or CMSA's (see further explanation below). The revised definitions appear in OMB press release 83-20 of June 27, 1983. The official standards for defining MSA's appeared in the Federal Register, January 3, 1980 (part 6). Revisions of MSA definitions are made periodically by OMB, mainly to add newly qualified MSA's or central cities.

The list of areas which follows (see p. 898) specifies components and population totals and refers to the definitions in effect on June 30, 1990. On that date, there were 268 MSA's, as well as 21 CMSA's comprising 73 PMSA's (including 4 MSA's, 1 CMSA, and 2 PMSA's in Puerto Rico).

The general concept of a metropolitan area is one of a large population nucleus, together with adjacent communities which have a high degree of economic and social integration with that nucleus. Standard definitions of metropolitan statistical areas were first issued in 1949 by the then Bureau of the Budget (predecessor of OMB), under the designation, "Standard Metropolitan Areas"; the term was changed to SMSA in 1959. From 1977 to 1981, the SMSA's were the responsibility of the Office of Federal Statistical Policy and Standards, Department of Commerce.

The criteria for the establishment and definition of SMSA's were modified in 1958, 1971, and 1975. The current standards were adopted in January 1980; they provide that each MSA must include at least:

(a) One city with 50,000 or more inhabitants, or

(b) A Census Bureau-defined urbanized area of at least 50,000 inhabitants *and* a total MSA population of at least 100,000 (75,000 in New England).

The standards provide that the MSA include as "central county(ies)" the county in which the central city is located, and adjacent counties, if any, with at least 50 percent of their population in the urbanized area. Additional "outlying counties" are included if they meet specified requirements of commuting to the central counties and of metropolitan character (such as population density and percent urban). In New England the MSA's are defined in terms of cities and towns rather than counties. The 1980 standards provide that within metropolitan complexes of 1 million or more population, separate component areas are defined if specified criteria are met. Such areas are designated primary metropolitan statistical areas (PMSA's); and any area containing PMSA's is designated a consolidated metropolitan statistical area (CMSA). Besides the 21 CMSA's, as of 1990 there were 18 MSA's of 1 million or more within which no component PMSA's have been established. Of the 73 PMSA's, most were formerly SMSA's, but some were newly established in 1983. Of the 21 CMSA's, most were previously recognized as standard consolidated statistical areas (SCSA's), but 5 were formerly SMSA's within which PMSA's were newly qualified in 1983. The standards adopted in 1980 were implemented in two stages. First, they were used to define a group of 36 new areas in June 1981. The 323 SMSA's as of June 30, 1981, were reported in the 1980 census tabulations and publications. Next, the boundaries of all SMSA's were reviewed in 1982-83 under the new standards after 1980 commuting data became available.

Revised 1980 standards for determining central cities and titles were implemented as part of the 1982-83 review. The largest city in each MSA is designated a "central city;" in addition there may be additional central cities if specified requirements are

met. The title of each MSA consists of the name(s) of up to three of its central cities and the name of each State into which the MSA extends. However, a central city generally is not included in an MSA title unless it has at least one-third the population of the area's largest city. Prior to 1983, virtually all central cities appeared in the area titles. An MSA may include other cities of 50,000 or more besides its central or title cities.

Standards for defining metropolitan areas after the 1990 census were issued by OMB in March 1990, revising the 1980 standards in a few respects. Effective in April 1990, the areas are collectively termed "metropolitan areas", although each individual area will continue to be designated an MSA, CMSA, or PMSA.

#### **New England MSA's and NECMA's.—**

Because MSA's in New England are defined in terms of cities and towns rather than counties, some statistical data that are available only for counties cannot be compiled for individual New England MSA's. Therefore, for New England areas, data are shown for both New England County Metropolitan Areas (NECMA's) and MSA's wherever possible. The NECMA's provide a county version of the New

England areas, but do not replace New England MSA's as the standard areas. NECMA's are defined corresponding to the three CMSA's in New England and for the portion of the New York-Northern New Jersey-Long Island CMSA in Connecticut. There are no NECMA definitions corresponding to New England PMSA's.

#### **Effect of changes in MSA definitions.—**

Changes in the definitions of MSA's since 1949 have consisted chiefly of (1) the recognition of new areas as, for example, cities reached 50,000 population; and (2) the addition of counties (or towns in New England) to existing MSA's as new census data showed them to qualify. Also, several formerly separate MSA's have been merged, and occasionally territory has been transferred from one MSA to another or from an MSA to nonmetropolitan territory. Comparisons of MSA figures over time may be affected in cases where the MSA definitions were changed. To maintain comparability, data for an earlier period have been revised in this volume where possible, to reflect the MSA boundaries of the more recent period. However, this could not always be done; for data based on a sample survey, in particular, it is usually not possible to revise the data to reflect changes in MSA definitions that occurred after the survey was made.

# Statistical Methodology and Reliability

**Introduction.**—The data presented in this *Statistical Abstract* came from many sources. The sources include not only Federal statistical bureaus and other organizations that collect and issue statistics as their principal activity, but also governmental administrative and regulatory agencies, private research bodies, trade associations, insurance companies, health associations, and private organizations such as the National Education Association and philanthropic foundations. Consequently, the data vary considerably as to reference periods, definitions of terms and, for ongoing series, the number and frequency of time periods for which data are available.

The statistics presented were obtained and tabulated by various means. Some statistics are based on complete enumerations or censuses while others are based on samples. Some information is extracted from records kept for administrative or regulatory purposes (school enrollment, hospital records, securities registration, financial accounts, social security records, income tax returns, etc.), while other information is obtained explicitly for statistical purposes through interviews or by mail. The estimation procedures used vary from highly sophisticated scientific techniques, to crude “informed guesses.”

Each set of data relates to a group of individuals or units of interest referred to as the *target universe* or *target population*, or simply as the *universe* or *population*. Prior to data collection, the target universe should be clearly defined. For example, if data are to be collected for the universe of households in the United States, it is necessary to define a “household.” The target universe may not be completely tractable. Cost and other considerations may restrict data collection to a *survey universe* of households on some available list, such list being inaccurate, out of date, defining “household” slightly differently, etc. This list is called a *survey frame* or *sampling frame*.

The data in many tables are based on data obtained for all population units, a

*census*, or on data obtained for only a portion, or *sample*, of the population units. When the data presented are based on a sample, the sample is usually a scientifically selected *probability sample*. This is a sample selected from a list or sampling frame in such a way that every possible sample has a known chance of selection and usually each unit selected can be assigned a number, between zero and one, representing its likelihood or probability of selection.

For large-scale sample surveys, the probability sample of units is often selected as a multistage sample. The first stage of a multistage sample is the selection of a probability sample of large groups of population members, referred to as primary sampling units (PSU's). For example, in a national multistage household sample, PSU's are often counties or groups of counties. The second stage of a multistage sample is the selection, within each PSU selected at the first stage, of smaller groups of population units, referred to as secondary sampling units. In subsequent stages of selection, smaller and smaller nested groups are chosen until the ultimate sample of population units is obtained. To qualify a multistage sample as a probability sample, all stages of sampling must be carried out using probability sampling methods.

Prior to selection at each stage of a multistage (or a single stage) sample, a list of the sampling units or sampling frame for that stage must be obtained. For example, for the first stage of selection of a national household sample, a list of the counties and county groups that form the PSU's must be obtained. For the final stage of selection, lists of households, and sometimes persons within the households, have to be compiled in the field. For surveys of economic entities and for the economic census, the Census Bureau generally uses a frame constructed from the Bureau's Standard Statistical Establishment List (SSEL). The SSEL contains all establishments with payroll in the United States including small single establishment firms as well as large multi-establishment firms.

Wherever the quantities in a table refer to an entire universe, but are constructed from data collected in a sample survey, the table quantities are referred to as *sample estimates*. In constructing a sample estimate, an attempt is made to come as close as is feasible to the corresponding universe quantity that would be obtained from a complete census of the universe. Estimates based on a sample will, however, generally differ from the hypothetical census figures. Two classifications of errors are associated with estimates based on sample surveys: (1) *sampling error*—the error arising from the use of a sample, rather than a census, to estimate population quantities and (2) *nonsampling error*—those errors arising from nonsampling sources. As discussed below, the magnitude of the sampling error for an estimate can usually be estimated from the sample data. However, the magnitude of the nonsampling error for an estimate can rarely be estimated. Consequently, actual error in an estimate exceeds the estimated error in the estimate.

The particular sample used in a survey is only one of a large number of possible samples of the same size which could have been selected using the same sampling procedure. Estimates derived from the different samples would, in general, differ from each other. The *standard error* (SE) is a measure of the variation among the estimates derived from all possible samples. The standard error is the most commonly used measure of the sampling error of an estimate. Valid estimates of the standard errors of survey estimates can usually be calculated from the data collected in a probability sample. For convenience, the standard error is sometimes expressed as a percent of the estimate and is called the relative standard error or *coefficient of variation* (CV). For example, an estimate of 200 units with an estimated standard error of 10 units has an estimated CV of 5 percent.

A sample estimate and an estimate of its standard error or CV can be used to construct interval estimates that have a prescribed confidence that the interval includes the average of the estimates derived from all possible samples with a known probability. To illustrate, if all possible samples were selected under essentially the same general conditions, and using the same sample design, and if an

estimate and its estimated standard error were calculated from each sample, then: 1) Approximately 68 percent of the intervals from one standard error below the estimate to one standard error above the estimate would include the average estimate derived from all possible samples; 2) approximately 90 percent of the intervals from 1.6 standard errors below the estimate to 1.6 standard errors above the estimate would include the average estimate derived from all possible samples; and 3) approximately 95 percent of the intervals from two standard errors below the estimate to two standard errors above the estimate would include the average estimate derived from all possible samples.

Thus, for a particular sample, one can say with the appropriate level of confidence (e.g., 90 percent or 95 percent) that the average of all possible samples is included in the constructed interval. Example of a confidence interval: An estimate is 200 units with a standard error of 10 units. An approximately 90 percent confidence interval (plus or minus 1.6 standard errors) is from 184 to 216.

All surveys and censuses are subject to nonsampling errors. Nonsampling errors are two kinds—*random* and *nonrandom*. Random nonsampling errors arise because of the varying interpretation of questions (by respondents or interviewers) and varying actions of coders, keyers, and other processors. Some randomness is also introduced when respondents must estimate values. These same errors usually have a nonrandom component. Nonrandom nonsampling errors result from total nonresponse (no usable data obtained for a sampled unit), partial or item nonresponse (only a portion of a response may be usable), inability or unwillingness on the part of respondents to provide correct information, difficulty interpreting questions, mistakes in recording or keying data, errors of collection or processing, and coverage problems (overcoverage and undercoverage of the target universe). Random nonresponse errors usually, but not always, result in an understatement of sampling errors and thus an overstatement of the precision of survey estimates. Estimating the magnitude of nonsampling errors would require special experiments or access to independent data and, consequently, the magnitudes are seldom available.

Nearly all types of nonsampling errors that affect surveys also occur in complete censuses. Since surveys can be conducted on a smaller scale than censuses, nonsampling errors can presumably be controlled more tightly. Relatively more funds and effort can perhaps be expended toward eliciting responses, detecting and correcting response error, and reducing processing errors. As a result, survey results can sometimes be more accurate than census results.

To compensate for suspected nonrandom errors, adjustments of the sample estimates are often made. For example, adjustments are frequently made for nonresponse, both total and partial. Adjustments made for either type of nonresponse are often referred to as *imputations*. Imputation for total nonresponse is usually made by substituting for the questionnaire responses of the nonrespondents the "average" questionnaire responses of the respondents. These imputations usually are made separately within various groups of sample members, formed by attempting to place respondents and nonrespondents together that have "similar" survey characteristics. Imputation for item nonresponse is usually made by substituting for a missing item the response to that item of a respondent having characteristics that are "similar" to those of the nonrespondent.

For an estimate calculated from a sample survey, the *total error* in the estimate is composed of the sampling error, which can usually be estimated from the sample, and the nonsampling error, which usually cannot be estimated from the sample. The total error present in a population quantity obtained from a complete census is composed of only nonsampling errors. Ideally, estimates of the total error associated with data given in the *Statistical Abstract* tables should be given. However, due to the unavailability of estimates of nonsampling errors, only estimates of the levels of sampling errors, in terms of estimated standard errors or coefficients of variation, are available. To obtain estimates of the estimated standard errors from the sample of interest, obtain a copy of the referenced report which appears at the end of each table.

**Principal data bases.**—Beginning below are brief descriptions of 34 of the sample surveys and censuses that provide a substantial portion of the data contained in this *Abstract*.

## SECTION 1. POPULATION

**Source and Title:** Bureau of the Census, *Census of Population*

**Tables:** See tables citing *Census of Population* in section 1 and also in sections 2, 4, 6, 8, 13, 14, 26, and 30, as well as the presentation of 1990 Census sample data beginning on page xii.

**Universe, Frequency, and Types of Data:** Complete count of U.S. population conducted every 10 years since 1790. Data obtained on number and characteristics of inhabitants.

**Type of Data Collection Operation:** In 1970, 1980, and 1990 complete census for some items—age, sex, race, marital status, and relationship to household head. In 1970, other items collected from a 5 percent and a 15 percent probability (systematic) sample of the population. In 1980, approximately 19 percent of the housing units were included in the sample; in 1990, approximately 17 percent.

**Data Collection and Imputation Procedures:** In 1970, extensive use of mail questionnaires in urban areas; personal interviews in most rural areas. In 1980 and 1990, mail questionnaires were used in even more areas than in 1970, with personal interviews in the remainder. Extensive telephone and personal followup for nonrespondents was done in the censuses. Imputations were made for missing characteristics.

**Estimates of Sampling Error:** Sampling errors for data are estimated for all items collected by sample and vary by characteristic and geographic area. The CV's for national and State estimates are generally very small.

**Other (nonsampling) Errors:** Since 1950, evaluation programs have been conducted to provide information on the magnitude of some sources of nonsampling errors such as response bias and undercoverage in each census. Preliminary results from the evaluation program for the 1990 census indicate that the net under coverage amounted to about 2 percent of the total resident population.

**Sources of Additional Material:** U.S. Bureau of the Census, *The Coverage of Population in the 1980 Census*, PHC80-E4; *Content Reinterview Study: Accuracy of Data for Selected Population and Housing Characteristics as Measured by Reinterview*, PHC80-E2; *1980 Census of Population*, vol 1., (PC80-1), appendixes B, C, and D.

**Source and Title:** U.S. Bureau of the Census, *Current Population Survey (CPS)*

**Tables:** See tables citing *Current Population Reports* primarily in section 1, but also in sections 2, 3, 4, 8, 12, 13, 14, 23, and 30. Many Bureau of Labor Statistics' (BLS) tables in section 13 are CPS based.

**Universe, Frequency, and Types of Data:**

Nationwide monthly sample survey of civilian noninstitutional population, 15 years old or over, to obtain data on employment, unemployment, and a number of other characteristics.

**Type of Data Collection Operation:** Multi-stage probability sample of about 60,000 households in 729 PSU's in 1989. Oversampling in some States and the largest MSA's to improve reliability for those areas of employment data on annual average basis. A continual sample rotation system is used. Households are in sample 4 months, out for 8 months, and in for 4 more. Month-to-month overlap is 75 percent; year-to-year overlap is 50 percent.

**Data Collection and Imputation Procedures:** For first and fifth months that a household is in sample, personal interviews; other months, approximately, 85 percent of the data collected by phone. Imputation is done for both item and total nonresponse. Adjustment for total nonresponse is done by a predefined cluster of units, by MSA size and residence; for item nonresponse imputation varies by subject matter.

**Estimates of Sampling Error:** Estimated CV's on national annual averages for labor force, total employment, and nonagricultural employment, 0.2 percent; for total unemployment and agricultural employment, 1.0 percent to 2.5 percent. The estimated CV's for family income and poverty rate for all persons in 1986 are 0.5 percent and 1.5 percent, respectively. CV's for subnational areas, such as States, would be larger and would vary by area.

**Other (nonsampling) Errors:** Estimates of response bias on unemployment are not available, but estimates of unemployment are usually 5 percent to 9 percent lower than estimates from reinterviews. Sample households unavailable for interviews is 4 to 5 percent.

**Sources of Additional Material:** U.S. Bureau of the Census and Bureau of Labor Statistics, *Concepts and Methods Used in Labor Force Statistics from Current Population Survey* (Census series P-23, No. 62; BLS Report No. 463) and Bureau of the Census, *Current Population Survey* (Tech. Paper 40) and Bureau of Labor Statistics, *Employment and Earnings*, monthly, Explanatory Notes, table A-K and *BLS Handbook of Methods*, chapter 1 (Bulletin 2285).

## SECTION 2. VITAL STATISTICS

**Source and Title:** U.S. National Center for Health Statistics (NCHS), *Vital Registration System*

**Tables:** See tables citing *Vital Statistics of the United States*, 292 in section 5; and 1345 in section 30.

**Universe, Frequency, and Types of Data:** Annual data on births and deaths in the United States.

**Type of Data Collection Operation:** Mortality data based on complete file of death records, except 1972, based on 50 percent sample. Natality statistics 1951-71, based on 50 percent sample of birth certificates, except a 20 percent to 50 percent in 1967, received by NCHS. Beginning 1972, data from some States received through Vital Statistics Cooperative Program (VSCP) and complete file used; data from other States based on 50 percent sample. Beginning 1986, all reporting areas participated in the VSCP.

**Data Collection and Imputation Procedures:** Reports based on records from registration offices of all States, District of Columbia, New York City, Puerto Rico, Virgin Islands, and Guam.

**Estimates of Sampling Error:** For recent years, CV's for births are small due to large portion of total file in sample (except for very small estimated totals).

**Other (nonsampling) Errors:** Data on births and deaths believed to be at least 99 percent complete.

**Sources of Additional Material:** U.S. National Center for Health Statistics, *Vital Statistics of the United States*, vol. I and vol. II, annual, and *Monthly Vital Statistics Report*. (See section 1 above for information pertaining to tables 91-93, 96 and 97.)

## SECTION 3. HEALTH AND NUTRITION

**Source and Title:** U.S. National Center for Health Statistics, *National Health Interview Survey (NHIS)*

**Tables:** 157, 162, 163, 184, 188, 189, 194, 195, 199, 201-203, and 209.

**Universe, Frequency, and Types of Data:** Continuous data collection covering the civilian noninstitutional population to obtain information on personal and demographic characteristics, illnesses, injuries, impairments, and other health topics.

**Type of Data Collection Operation:** Multi-stage probability sample of 42,000 households (in 376 PSU's) selected in groups of about four adjacent households.

**Data Collection and Imputation Procedures:** Personal household interviews with extensive followup of nonrespondents. Data are adjusted for nonresponse by imputation procedure based on "average" characteristics of persons in interviewed households in the same geographic area.

**Estimates of Sampling Error:** Estimated CV's: For physician visits by males, 1.5 percent; for workdays lost by males, 3.5 percent; for persons injured at home, 4.7 percent.

**Other (nonsampling) Errors:** Response rate was 95.7 percent in 1985 for the NHIS.

**Sources of Additional Material:** U.S. National Center for Health Statistics, "Current Estimates from the National Health Interview Survey, U.S., 1983," Vital and Health Statistics, series 10.

(See section 15 for information pertaining to table 151.)

#### SECTION 4. EDUCATION

**Source and Title:** U.S. Department of Education, National Center for Education Statistics, *Higher Education General Information Survey (HEGIS), Fall Enrollment in Institutions of Higher Education*; beginning 1986, *Integrated Postsecondary Education Data Survey (IPEDS), Fall Enrollment*

**Tables:** 259, 261-264, and 281.

**Universe, Frequency, and Types of Data:** Annual survey of all institutions and branches listed in the *Directory* to obtain data on total enrollment by sex, level of enrollment, type of program, racial/ethnic characteristics (in alternate years) and attendance status of student, and on first-time students.

**Type of Data Collection Operation:** Complete census.

**Data Collection and Imputation Procedures:** Survey package is usually mailed in the spring with surveys due at varying dates in the summer and fall; mail and phone followup procedures for nonrespondents. Missing data are imputed by using data of similar institutions.

**Estimates of Sampling Error:** Not applicable.

**Other (nonsampling) Errors:** Approximately 82 percent response rate.

**Sources of Additional Material:** U.S. Department of Education, National Center for Education Statistics, *Fall Enrollment in Higher Education*, annual.

**Source and Title:** U.S. Department of Education, National Center for Education Statistics, *Higher Education General Information Survey (HEGIS), Financial Statistics of Institutions of Higher Education*; beginning 1986, *Integrated Postsecondary Education Data Survey (IPEDS), Financial Statistics of Institutions of Higher Education*

**Tables:** 211, 214, 262, and 266.

**Universe, Frequency, and Types of Data:** Annual survey of all institutions and branches listed in the *Education Directory*,

*Colleges and Universities* to obtain data on financial status and operations, including current funds revenues, current funds expenditures, and physical plant assets.

**Type of Data Collection Operation:** Complete census.

**Data Collection and Imputation Procedures:** Survey package is usually mailed in the spring with surveys due at varying dates in the summer and fall; mail and phone followup procedures for nonrespondents. Missing data are imputed by using data of similar institutions.

**Estimates of Sampling Error:** Not applicable.

**Other (nonsampling) Errors:** For 1990, a 87 percent response rate. Imputed expenditures amounted to about 2.8 percent of total expenditures.

**Sources of Additional Material:** U.S. Department of Education, National Center for Education Statistics, *Financial Statistics of Institutions of Higher Education*, annual.

**Source and Title:** U.S. Department of Education, National Center for Education Statistics, *Higher Education General Information Survey (HEGIS), Degrees and Other Formal Awards Conferred*. Beginning 1986, *Integrated Postsecondary Education Data Survey (IPEDS), Degrees and Other Formal Awards Conferred*.

**Tables:** 278-282.

**Universe, Frequency, and Types of Data:** Annual survey of all institutions and branches listed in the *Education Directory*, *Colleges and Universities* to obtain data on earned degrees and other formal awards, conferred by field of study, level of degree, sex, and by racial/ethnic characteristics (in alternate years).

**Type of Data Collection Operation:** Complete census.

**Data Collection and Imputation Procedures:** Survey package is usually mailed in the spring with surveys due at varying dates in the summer and fall; mail and phone followup procedures for nonrespondents. Missing data are imputed by using data of similar institutions.

**Estimates of Sampling Error:** Not applicable.

**Other (nonsampling) Errors:** For 1989-90, approximately 92.3 percent response rate.

**Sources of Additional Material:** U.S. Department of Education, National Center for Education Statistics, *Earned Degrees Conferred*, annual.

(See sections 1 and 9 for information pertaining to the Bureau of the Census and section 3 above for the National Center for Health Statistics.)

## SECTION 5. LAW ENFORCEMENT, COURTS, AND PRISONS

**Source and Title:** U.S. Federal Bureau of Investigation, *Uniform Crime Reporting (UCR) Program*

**Tables:** 287-291, 293, 294, 302, and 304.

**Universe, Frequency, and Types of Data:** Monthly reports on the number of criminal offenses that become known to law enforcement agencies. Data are collected on crimes cleared by arrest, by age, sex, and race of offender, and on assaults on law enforcement officers.

**Type of Data Collection Operation:** Crime statistics are based on reports of crime data submitted either directly to the FBI by contributing law enforcement agencies or through cooperating State UCR programs.

**Data Collection and Imputation Procedures:** States with UCR programs collect data directly from individual law enforcement agencies and forward reports, prepared in accordance with UCR standards, to FBI. Accuracy and consistency edits are performed by FBI.

**Estimates of Sampling Error:** Not applicable.

**Other (nonsampling) Errors:** Coverage of 96 percent of the population (98 percent in SMSA's, 93 percent in "other cities," and 89 percent in rural areas) by UCR program, though varying number of agencies report. Some error may be present through incorrect reporting.

**Sources of Additional Material:** U.S. Federal Bureau of Investigation, *Crime in the United States*.

**Source and Title:** U.S. Bureau of Justice Statistics (BJS), *National Crime Survey*

**Tables:** 295-299.

**Universe, Frequency, and Types of Data:** Monthly survey of individuals and households in the United States to obtain data on criminal victimization of those units for compilation of annual estimates.

**Type of Data Collection Operation:** National probability sample survey of about 50,000 interviewed households in 376 PSU's selected from a list of addresses from the 1980 census, supplemented by new construction permits and an area sample where permits are not required.

**Data Collection and Imputation Procedures:** Interviews are conducted every 6 months for 3 years for each household in the sample; 8,000 households are interviewed monthly. Personal interviews are used in the first and fifth interviews; the intervening interviews are conducted by telephone whenever possible.

**Estimates of Sampling Error:** CV's in 1985: 2.2 percent for crimes of violence; 14.8 percent for estimate of rape counts; 5.5 percent for robbery counts; 2.5 percent for assault counts; 1.4 percent for personal larceny counts; 2.2 percent for burglary counts; 1.8 percent for household larceny; 1.3 percent for all household crimes; and 4.8 percent for motor vehicle theft counts.

**Other (nonsampling) Errors:** Respondent recall errors which may include reporting incidents for other than the reference period; interviewer coding and processing errors; and possible mistaken reporting or classifying of events. Adjustment is made for a household noninterview rate of about 4 percent and for a smaller within-household noninterview rate.

**Sources of Additional Material:** U.S. Bureau of Justice Statistics, *Criminal Victimization in the United States*, annual.

(See section 2 for details on table 292 and section 9 for details on table 313.)

## SECTION 6. GEOGRAPHY AND ENVIRONMENT

(See section 9 below for information pertaining to table 358.)

## SECTION 8. ELECTIONS

(See section 1 above for information pertaining to tables 417 and 435.)

## SECTION 9. STATE AND LOCAL GOVERNMENT FINANCES AND EMPLOYMENT

**Source and Title:** U.S. Bureau of the Census, *Census of Governments*

**Tables:** See tables in section 9 citing *Census of Governments*.

**Universe, Frequency, and Types of Data:** Survey of all governmental units in the United States conducted every 5 years to obtain data on government revenue, expenditures, debt, assets, employment and employee retirement systems, property values, public school systems, and number, size, and structure of governments.

**Type of Data Collection Operation:** Complete census. List of units derived through classification of government units recently authorized in each State and identification, counting, and classification of existing local governments and public school systems.

**Data Collection and Imputation Procedures:** Data collected through field and office compilation of financial data from official records and reports for States and large local governments; mail canvass of selected data items, like State tax revenue and employee retirement systems; and collection of local government statistics through central collection arrangements with State governments.

**Estimates of Sampling Error:** Not applicable.

**Other (nonsampling) Errors:** Some non-sampling errors may arise due to possible inaccuracies in classification, response, and processing.

**Sources of Additional Material:** U.S. Bureau of the Census, *Census of Governments, 1987*, various reports, and *State Government Finances in 1990*, GF 90, No. 3.

**Source and Title:** U.S. Bureau of the Census, *Annual Surveys of State and Local Government*

**Tables:** See tables citing *Public Employment and Governmental Finances* in section 9; table 238 in section 4; table 313 in section 5; table 358 in section 6; and table 581 in section 12.

**Universe, Frequency, and Types of Data:** Sample survey conducted annually to obtain data on revenue, expenditure, debt, and employment of State and local governments. Universe is all governmental units in the United States (about 83,000).

**Type of Data Collection Operation:** Sample of about 22,000 units includes all State governments, county governments with 50,000+ population, municipalities and townships with 25,000+ population, all school districts with 10,000+ enrollment in October 1986, and other governments meeting certain criteria; probability sample for remaining units.

**Data Collection and Imputation Procedures:** Field and office compilation of data from official records and reports for States and large local governments; central collection of local governmental financial data through cooperative agreements with a number of State governments; mail canvass of other units with mail and telephone followups of nonrespondents. Data for nonresponses are imputed from previous year data or obtained from secondary sources, if available.

**Estimates of Sampling Error:** CV's for estimates of major employment and financial items are generally less than 2 percent for most States and less than 1.2 percent for the majority of States.

**Other (nonsampling) Errors:** Nonresponse rate is less than 15 percent for number of units. Other possible errors may result from undetected inaccuracies in classification, response, and processing.

**Sources of Additional Material:** U.S. Bureau of the Census, *Public Employment in 1990*, GE 90, No. 1, *Governmental Finances in 1989-90*, GF 90, No. 5, and *Census of Governments, 1987*, various reports.

## SECTION 10. FEDERAL GOVERNMENT

**Source and Title:** U.S. Internal Revenue Service, *Statistics of Income, Individual Income Tax Returns*

**Tables:** 508-512.

**Universe, Frequency, and Types of Data:** Annual study of unaudited individual income tax returns, Forms 1040, 1040A, and 1040EZ, filed by U.S. citizens and residents. Data provided on various financial characteristics by size of adjusted gross income, marital status, and by taxable and nontaxable returns. Data by State, based on 100 percent file, also include returns from 1040NR, filed by nonresident aliens plus certain self-employment tax returns.

**Type of Data Collection Operation:** Annual stratified probability sample of approximately 125,000 returns broken into sample strata based on the larger of total income or total loss amounts as well as the size of business plus farm receipts. Sampling rates for sample strata varied from 0.025 percent to 100 percent.

**Data Collection and Imputation Procedures:** Computer selection of sample of tax return records. Data adjusted during editing for incorrect, missing, or inconsistent entries to ensure consistency with other entries on return.

**Estimates of Sampling Error:** Estimated CV's for tax year 1987: Adjusted gross income less deficit 0.13 percent; salaries and wages 0.20 percent; and tax-exempt interest received 4.51 percent. (State data not subject to sampling error.)

**Other (nonsampling) Errors:** Processing errors and errors arising from the use of tolerance checks for the data.

**Sources of Additional Material:** U.S. Internal Revenue Service, *Statistics of Income, Individual Income Tax Returns*, annual.

## SECTION 12. SOCIAL INSURANCE AND HUMAN SERVICES

**Source and Title:** U.S. Social Security Administration, *Benefit Data*

**Tables:** 573 and 574.

**Universe, Frequency, and Types of Data:** All persons receiving monthly benefits under Title 11 of Social Security Act. Data on number and amount of benefits paid by type and State.

**Type of Data Collection Operation:** Data based on administrative records. Data based on 100 percent files, as well as 10 percent and 1 percent sample files.

**Data Collection and Imputation Procedures:** Records used consist of actions pursuant to applications for benefits, updated by subsequent post-entitlement actions.

**Estimates of Sampling Error:** Varies by size of estimate and sample file size.

**Other (nonsampling) Errors:** Processing errors, which are believed to be small.

**Sources of Additional Material:** U.S. Social Security Administration, *Annual Statistical Supplement to the Social Security Bulletin*.

**Source and Title:** U.S. Social Security Administration, *Supplemental Security Income (SSI) Program*

**Tables:** 592-595.

**Universe, Frequency, and Types of Data:**

All eligible aged, blind, or disabled persons receiving SSI benefit payments under SSI program. Data include number of persons receiving federally administered SSI, amounts paid, and State administered supplementation.

**Type of Data Collection Operation:** Data based on administrative records.

**Data Collection and Imputation Procedures:** Data adjusted to reflect returned checks and overpayment refunds. For federally administered payments, actual adjusted amounts are used.

**Estimates of Sampling Error:** Not applicable.

**Other (nonsampling) Errors:** Processing errors, which are believed to be small.

**Sources of Additional Material:** U.S. Social Security Administration, *Annual Statistical Supplement to the Social Security Bulletin*.

(See section 1 above for information pertaining to the Current Population Survey, section 3 for information pertaining to the National Center for Health Statistics, and section 9 for information pertaining to Annual Surveys of State and Local Government.)

### SECTION 13. LABOR FORCE, EMPLOYMENT, AND EARNINGS

**Source and Title:** U.S. Bureau of Labor Statistics (BLS), *Current Employment Statistics (CES)* Program

**Tables:** 643-645, 650; in section 21, table 986; in section 22, table 1050; and in section 24, table 1135.

**Universe, Frequency, and Types of Data:**

Monthly survey covering about 5 million nonagricultural establishments to obtain data on employment, hours, and earnings, by industry.

**Type of Data Collection Operation:** Sample survey of over 350,000 establishments in March 1990.

**Data Collection and Imputation Procedures:** Cooperating State agencies mail questionnaires to sample establishments to develop State and local estimates; information is forwarded to BLS where national estimates are prepared.

**Estimates of Sampling Error:** Estimated CV's for average weekly hours paid, 0.1 percent and for average hourly earnings, 0.2 percent.

**Other (nonsampling) Errors:** Estimates of employment adjusted annually to reflect complete universe. Average adjustment is 0.2 percent.

**Sources of Additional Material:** U.S. Bureau of Labor Statistics, *Employment and Earnings*, monthly, Explanatory Notes, tables L-Q and *BLS Handbook of Methods*, Chapter 2, Bulletin 2285 (Apr. 1988).

(See section 1 above for information pertaining to the Current Population Survey.)

### SECTION 14. INCOME, EXPENDITURES, AND WEALTH

(See section 1 above for information pertaining to the Bureau of the Census.)

### SECTION 15. PRICES

**Source and Title:** U.S. Bureau of Labor Statistics (BLS), *Consumer Price Index (CPI)*

**Tables:** 737-743, 758, and in section 3, table 151.

**Universe, Frequency, and Types of Data:**

Monthly survey of price changes of all types of consumer goods and services purchased by urban wage earners and clerical workers prior to 1978, and urban consumers thereafter. Both indexes continue to be published.

**Type of Data Collection Operation:** Prior to 1978, sample of various consumer items in 56 urban areas; thereafter, in 85 PSU's, except from January 1987 through March 1988, when 91 areas were sampled.

**Data Collection and Imputation Procedures:** Prices of consumer items are obtained from about 57,000 housing units, and 19,000 other reporters in 85 areas. Prices of food, fuel, and a few other items are obtained monthly; prices of most other commodities and services are collected every month in the five largest geographic areas and every other month in others.

**Estimates of Sampling Error:** Estimates of standard errors are not available at present.

**Other (nonsampling) Errors:** Errors result from inaccurate reporting, difficulties in defining concepts and their operational implementation, and introduction of product quality changes and new products.

**Sources of Additional Material:** U.S. Bureau of Labor Statistics, *The Consumer Price Index: 1987 Revision*, Report 736, and *BLS Handbook of Methods*, Bulletin 2285.

**Source and Title:** U.S. Bureau of Labor Statistics, *Producer Price Index (PPI)*

**Tables:** 737, 746-749 in section 21, table 1035; in section 24, table 1139; and in section 26, table 1202.

**Universe, Frequency, and Types of Data:**

Monthly survey of producing companies to determine price changes of all commodities produced in the United States for sale in commercial transactions. Data on agriculture, forestry, fishing, manufacturing, mining, gas, electricity, public utilities and a few services.

**Type of Data Collection Operation:** Probability sample of approximately 3,100 commodities and about 75,000 quotations per month.

**Data Collection and Imputation Procedures:**

Data are collected by mail. If transaction prices are not supplied, list prices are used. Some prices are obtained from trade publications, organized exchanges, and government agencies. To calculate index, price changes are multiplied by their relative weights based on total net selling value of all commodities in 1982.

**Estimates of Sampling Error:** Not applicable.

**Other (nonsampling) Errors:** Not available at present.

**Sources of Additional Material:** U.S. Bureau of Labor Statistics, *BLS Handbook of Methods*, Bulletin 2285.

## SECTION 17. BUSINESS ENTERPRISE

**Source and Title:** U.S. Internal Revenue Service, *Statistics of Income, Sole Proprietorship Returns* and *Statistics of Income Bulletin*

**Tables:** 826-829.

**Universe, Frequency, and Types of Data:**

Annual study of unaudited income tax returns of nonfarm sole proprietorships, Form 1040 with business schedules. Data provided on various financial characteristics by industry.

**Type of Data Collection Operation:** Stratified probability sample of approximately 31,000 sole proprietorships for tax year 1990. The sample is classified based on presence or absence of certain business schedules; the larger of total income or loss; and size of business plus farm receipts. Sampling rates vary from 0.043 percent to 100 percent.

**Data Collection and Imputation Procedures:**

Computer selection of sample of tax return records. Data adjusted during editing for incorrect, missing, or inconsistent entries to ensure consistency with other entries on return.

**Estimates of Sampling Error:** Estimated CV's for tax year 1990 are not available; for 1987 (the latest available): For sole proprietorships, business receipts, 1.66 percent;

net income, (less loss), 1.33 percent; depreciation 2.17 percent; interest expense 2.80 percent; and employee benefit programs 7.55 percent.

**Other (nonsampling) Errors:** Processing errors and errors arising from the use of tolerance checks for the data.

**Sources of Additional Material:** U.S. Internal Revenue Service, *Statistics of Income, Sole Proprietorship Returns* (for years through 1980) and *Statistics of Income Bulletin*, Vol. 10, No. 1 (Summer 1990).

**Source and Title:** U.S. Internal Revenue Service, *Statistics of Income, Partnership Returns* and *Statistics of Income Bulletin*

**Tables:** 826-828, 830, and 831.

**Universe, Frequency, and Types of Data:**

Annual study of unaudited income tax returns of partnerships, Form 1065. Data provided on various financial characteristics by industry.

**Type of Data Collection Operation:** Stratified probability sample of approximately 28,000 partnership returns from a population of 1,660,000 filed during calendar year 1990. The sample is classified based on combinations of gross receipts, net income or loss, and total assets, and on industry. Sampling rates vary from 0.04 percent to 100 percent.

**Data Collection and Imputation Procedures:**

Computer selection of sample of tax return records. Data are adjusted during editing for incorrect, missing, or inconsistent entries to ensure consistency with other entries on return. Data not available due to regulations are not imputed.

**Estimates of Sampling Error:** Estimated CV's for tax year 1988 (latest available): For number of partnerships, 0.51 percent; business receipts, 0.78 percent; net income, 3.03 percent; net loss, 2.21 percent and total assets, 1.22 percent.

**Other (nonsampling) Errors:** Processing errors and errors arising from the use of tolerance checks for the data.

**Sources of Additional Material:** U.S. Internal Revenue Service, *Statistics of Income, Partnership Returns* and *Statistics of Income Bulletin*, Vol. 10, No. 1 (Summer 1990).

**Source and Title:** U.S. Internal Revenue Service, *Corporation Income Tax Returns*

**Tables:** 826-828 and 834-836.

**Universe, Frequency, and Types of Data:**

Annual study of unaudited corporation income tax returns, Forms 1120 and 1120 (A, F, L, PC, REIT, RIC, and S), filed by corporations or businesses legally defined as corporations. Data provided on various financial characteristics by industry and size of total assets, and business receipts.

**Type of Data Collection Operation:** Stratified probability sample of approximately 85,000 returns for 1987, distributed by sample classes generally based on type of return, size of total assets, size of net income or deficit, and selected business activity. Sampling rates for sample strata varied from 0.25 percent to 100 percent.

**Data Collection and Imputation Procedures:** Computer selection of sample of tax return records. Data adjusted during editing for incorrect, missing, or inconsistent entries to ensure consistency with other entries on return and to achieve statistical definitions.

**Estimates of Sampling Error:** Estimated CV's for 1988: Number of returns in subgroups ranged from 1.4 percent with assets under \$100,000, to 0 percent with assets over \$100 mil.; for amount of net income and amount of income tax, 0.18 percent

**Other (nonsampling) Errors:** Processing errors and errors arising from the use of tolerance checks for the data.

**Sources of Additional Material:** U.S. Internal Revenue Service, *Statistics of Income, Corporation Income Tax Returns*, annual.

## SECTION 18. COMMUNICATIONS

(See section 27 for information pertaining to table 897.)

## SECTION 19. ENERGY

**Source and Title:** U.S. Energy Information Administration, *Residential Energy Consumption Survey*

**Tables:** 919-921, 951, and table 1232 in section 26.

**Universe, Frequency, and Types of Data:** Triennial survey of households and fuel suppliers. Data are obtained on energy-related household characteristics, housing unit characteristics, use of fuels, and energy consumption and expenditures by fuel type.

**Type of Data Collection Operation:** Probability sample of 7,183 eligible units in 129 PSU's. For responding units, fuel consumption and expenditure data obtained from fuel suppliers to those households.

**Data Collection and Imputation Procedures:** Personal interviews. Extensive followup of nonrespondents including mail questionnaires for some households. Adjustments for nonrespondents were made in weighting for respondents. Most item non-responses were imputed.

**Estimates of Sampling Error:** Estimated CV's for household averages: For consumption, 1.3 percent; for expenditures, 1.0 percent; for various fuels, values ranged from 1.4 percent for electricity to 5.9 percent for LPG.

**Other (nonsampling) Errors:** Household response rate of 86.7 percent. Nonconsumption data were mostly imputed for mail respondents (5.2 percent of eligible units). Usable responses from fuel suppliers for various fuels ranged from 82.8 percent for electricity to 55.7 percent for fuel oil.

**Sources of Additional Material:** U.S. Energy Information Administration, *Household Energy Consumption and Expenditures, 1987* and *Housing Characteristics, 1987*.

## SECTION 21. TRANSPORTATION—LAND

(See section 13 for table 986, and section 15 for table 1035.)

## SECTION 22. TRANSPORTATION—AIR AND WATER

**Source and Title:** U.S. Bureau of the Census, *Foreign Trade—Export Statistics*

**Tables:** See Bureau of the Census citations for export statistics in source notes in sections 22 and 29 and also tables 1162 and 1163 in section 24; 1176 in section 25; and 1354 in section 30.

**Universe, Frequency, and Types of Data:** The export declarations collected by Customs are processed each month to obtain data on the movement of U.S. merchandise exports to foreign countries. Data obtained include value, quantity, and shipping weight of exports by commodity, country of destination, Customs district of exportation, and mode of transportation.

**Type of Data Collection Operation:** Shipper's Export Declarations are required to be filed for the exportation of merchandise valued over \$1,500. Customs officials collect and transmit the documents to the Bureau of the Census on a flow basis for data compilation. Value data for shipments valued under \$1,501 are estimated, based on established percentages of individual country totals.

**Data Collection and Imputation Procedures:** Statistical copies of Shipper's Export Declarations are received on a daily basis from Customs ports throughout the country and subjected to a monthly processing cycle. They are fully processed to the extent they reflect items valued over \$1,500. Estimates for shipments valued at \$1,500 or less are made, based on established percentages of individual country totals.

**Estimates of Sampling Error:** Not applicable.

**Other (nonsampling) Errors:** Clerical and complex computer checks intercept most processing errors and minimize otherwise significant reporting errors; other nonsampling errors are caused by undercounting of exports to Canada due to the nonreceipt of some Shipper's Export Declarations.

**Sources of Additional Material:** U.S. Bureau of the Census, *U.S. Merchandise Trade: Exports, General Imports, and Imports for Consumption, SITC, Commodity by Country*, FT 925.

**Source and Title:** U.S. Bureau of the Census, *Foreign Trade—Import Statistics*

**Tables:** See Bureau of the Census citations for import statistics in source notes in sections 22 and 29 and also tables 1162 and 1163 in section 24; 1176 in section 25; and 1354 in section 30.

**Universe, Frequency, and Types of Data:** The import entry documents collected by Customs are processed each month to obtain data on the movement of merchandise imported into the United States. Data obtained include value, quantity, and shipping weight by commodity, country of origin, Customs district of entry, and mode of transportation.

**Type of Data Collection Operation:** Import entry documents are required to be filed for the importation of goods into the United States valued over \$1,000 or for articles which must be reported on formal entries. Customs officials collect and transmit statistical copies of the documents to the Bureau of the Census on a flow basis for data compilation. Estimates for shipments valued under \$1,001 and not reported on formal entries are based on established percentages of individual country totals.

**Data Collection and Imputation Procedures:** Statistical copies of import entry documents, received on a daily basis from Customs ports of entry throughout the country, are subjected to a monthly processing cycle. They are fully processed to the extent they reflect items valued at \$1,001 and over or items which must be reported on formal entries.

**Estimates of Sampling Error:** Not applicable.

**Other (nonsampling) Errors:** Verification of statistical data reporting by Customs officials prior to transmittal and a subsequent program of clerical and computer checks are utilized to hold nonsampling errors arising from reporting and/or processing errors to a minimum.

**Sources of Additional Material:** U.S. Bureau of the Census, *U.S. Merchandise Trade: Exports, General Imports and Imports for Consumption, SITC, Commodity by Country*, FT 925.

(See section 13 for information pertaining to table 1050.)

## SECTION 23. AGRICULTURE

**Source and Title:** U.S. Department of Agriculture, National Agricultural Statistics Service (NASS), *Basic Area Frame Sample*

**Tables:** See tables citing NASS in source notes in section 23, which pertain to this or the following two surveys.

**Universe, Frequency, and Types of Data:** Two annual area sample surveys of U.S. farm operators: June agricultural survey collects data on planted acreage and livestock inventories; and a February Farm Costs and Returns survey that collects data on total farm production, expenses and specific commodity costs of production.

**Type of Data Collection Operation:** Stratified probability sample of about 16,000 land area units of about 1 sq. mile (range from .1 sq. mile in cities to several sq. miles in open grazing areas). Sample includes 60,000 parcels of agricultural land. About 20 percent of the sample replaced annually.

**Data Collection and Imputation Procedures:** Data collection is by personal enumeration. Imputation is based on enumerator observation or data reported by respondents having similar agricultural characteristics.

**Estimates of Sampling Error:** Estimated CV's range from 1 percent to 2 percent for regional estimates to 3 percent to 6 percent for State estimates of livestock inventories.

**Other (nonsampling) Errors:** Minimized through rigid quality controls on the collection process and careful review of all reported data.

**Sources of Additional Material:** U.S. Department of Agriculture, SRS, *Scope and Methods of the Statistical Reporting Service*, (name changed to National Agricultural Statistics Service), Miscellaneous Publication No. 1308, September 1983 (revised).

**Source and Title:** U.S. Department of Agriculture, National Agricultural Statistics Service (NASS), *Multiple Frame Surveys*

**Tables:** See tables citing NASS in source notes in section 23, which pertain to this or the following survey.

**Universe, Frequency, and Types of Data:** Surveys of U.S. farm operators to obtain data on major livestock inventories, selected crop acreages and production, grain stocks, and farm labor characteristics; and to obtain farm economic data for price indexing.

**Type of Data Collection Operation:** Primary frame is obtained from general or special purpose lists, supplemented by a probability sample of land areas used to estimate for list incompleteness.

**Data Collection and Imputation Procedures:**

Mail, telephone or personal interviews used for initial data collection. Mail nonrespondent followup by phone and personal interviews. Imputation based on average of respondents.

**Estimates of Sampling Error:** Estimated CV for number of hired farm workers is about 3 percent. Estimated CV's range from 1 percent to 2 percent for regional estimates to 3 percent to 6 percent for State estimates of livestock inventories.

**Other (nonsampling) Errors:** In addition to above, replicated sampling procedures used to monitor effects of changes in survey procedures.

**Sources of Additional Material:** U.S. Department of Agriculture, SRS, *Scope and Methods of the Statistical Reporting Service*, (name changed to National Agricultural Statistics Service), Miscellaneous Publication No. 1308, September 1983 (revised).

**Source and Title:** U.S. Department of Agriculture, National Agricultural Statistics Service (NASS), *Objective Yield Surveys*

**Tables:** See tables citing NASS in source notes in section 23, which pertain to this or the preceding survey.

**Universe, Frequency, and Types of Data:**

Surveys for data on corn, cotton, potatoes, soybeans, wheat, and rice to forecast and estimate yields.

**Type of Data Collection Operation:** Random location of plots in probability sample of fields. Fields selected in June from Basic Area Frame Sample (see above).

**Data Collection and Imputation Procedures:**

Enumerators count and measure plant characteristics in sample fields. Production measured from plots at harvest. Harvest loss measured from post harvest gleanings.

**Estimates of Sampling Error:** CV's for national estimates of production are about 2 percent to 3 percent.

**Other (nonsampling) Errors:** In addition to above, replicated sampling procedures used to monitor effects of changes in survey procedures.

**Sources of Additional Material:** U.S. Department of Agriculture, SRS, *Scope and Methods of the Statistical Reporting Service*, (name changed to National Agricultural Statistics Service), Miscellaneous Publication No. 1308, September 1983 (revised).

(See section 1 above for information pertaining to the Census of Population and Current Population Survey.)

## SECTION 24. FORESTS AND FISHERIES

(See section 13 for information pertaining to table 1135, section 15 for table 1139, and section 22 for tables 1162 and 1163.)

## SECTION 26. CONSTRUCTION AND HOUSING

**Source and Title:** U.S. Bureau of the Census, *Monthly Survey of Construction*

**Tables:** 1211, and 1213-1215.

**Universe, Frequency, and Types of Data:**

Survey conducted monthly of newly constructed housing units (excluding mobile homes). Data are collected on the start, completion, and sale of housing. (Annual figures are aggregates of monthly estimates.)

**Type of Data Collection Operation:** Probability sample of housing units obtained from building permits selected from 17,000 places. For nonpermit places, multistage probability sample of new housing units selected in 169 PSU's. In those areas, all roads are canvassed in selected enumeration districts.

**Data Collection and Imputation Procedures:**

Data are obtained by telephone inquiry and field visit.

**Estimates of Sampling Error:** Estimated CV of 3 percent to 4 percent for estimates of national totals, but are as high as 20 percent for estimated totals of more detailed characteristics, such as housing units in multiunit structures.

**Other (nonsampling) Errors:** Response rate is over 90 percent for most items. Nonsampling errors are attributed to definitional problems, differences in interpretation of questions, incorrect reporting, inability to obtain information about all cases in the sample, and processing errors.

**Sources of Additional Material:** U.S. Bureau of the Census, *Construction Reports*, series C20, *Housing Starts*; C22, *Housing Completions*; and C25, *New One-Family Houses Sold and For Sale*.

**Source and Title:** U.S. Bureau of the Census, *Value of New Construction Put in Place*

**Tables:** 1204-1206.

**Universe, Frequency, and Types of Data:**

Survey conducted monthly on total value of all construction put in place in the current month, both public and private projects. Construction values include costs of materials and labor, contractors' profits, overhead costs, cost of architectural and engineering work, and miscellaneous project costs. (Annual figures are aggregates of monthly estimates.)

**Type of Data Collection Operation:** Varies by type of activity: Total cost of private one-family houses started each month is distributed into value put in place using fixed patterns of monthly construction progress; using a multistage probability sample, data for private multifamily housing are obtained by mail from owners of multiunit projects. Data for residential additions and alterations are obtained in a quarterly survey measuring expenditures; monthly estimates are interpolated from quarterly data. Estimates of value of private nonhousekeeping, nonresidential buildings, and State and local government construction are obtained by mail from owners (or agents) for a probability sample of projects. Estimates of farm nonresidential construction expenditures are based on U.S. Department of Agriculture annual estimates of construction; public utility estimates are obtained from reports submitted to Federal regulatory agencies and from private utility companies; estimates for all other private construction (nonbuilding) are obtained by phasing F. W. Dodge contract award data; estimates of Federal construction are based on monthly data supplied by Federal agencies.

**Data Collection and Imputation Procedures:** See "Type of Data Collection Operation." Imputation accounts for approximately 20 percent of estimated value of construction each month.

**Estimates of Sampling Error:** CV estimates for private nonresidential building construction range from 3 percent for estimated value of industrial buildings to 10 percent for miscellaneous buildings. CV is approximately 2 percent for total new private nonresidential buildings.

**Other (nonsampling) Errors:** For directly measured data series based on samples, some nonsampling errors may arise from processing errors, imputations, and misunderstanding of questions. Indirect data series are dependent on the validity of the underlying assumptions and procedures.

**Sources of Additional Material:** U.S. Bureau of the Census, *Construction Reports*, series C30, *Value of New Construction Put in Place*.

**Source and Title:** U.S. Bureau of the Census, *Census of Housing*

**Tables:** See tables citing *Census of Housing* in source notes in section 26, as well as the presentation of 1990 Census sample data beginning on page xii.

**Universe, Frequency, and Types of Data:** Census of all occupied and vacant housing, excluding group quarters, conducted every

10 years as part of the decennial census (see section 1 above) to determine characteristics of U.S. housing.

**Type of Data Collection Operation:** For 1970, 1980, and 1990, a complete count of some housing items (e.g. Owned or rented, and value). In 1970, other items collected from 5 percent and 15 percent probability samples selected from two sets of detailed questions on housing (these two sets having some common items). In 1980, approximately 19 percent of the housing units were included in the sample; in 1990, approximately 17 percent.

**Data Collection and Imputation Procedures:** In 1970, a self-enumeration census using a mail-out/mail-back procedure was used in most areas. In 1980 and 1990, mail questionnaires were used in even more areas than in 1970, with personal interviews in the remainder. Followup for nonrespondents and identification of vacant units done by phone and personal visit.

**Estimates of Sampling Error:** Sampling errors for data are estimated for all items collected by sample and vary by characteristic and geographic area.

**Other (nonsampling) Errors:** Evaluation studies for 1980 estimated the underenumeration of occupied housing units at 1.5 percent. The missed rate in 1980 for all units was 2.6 percent or approximately 2.3 million units, 1 million of which were vacant housing units.

**Sources of Additional Material:** U.S. Bureau of the Census, *1980 Census of Population and Housing, The Coverage of Housing in the 1980 Census*, PHC80-E1, July 1985.

**Source and Title:** U.S. Bureau of the Census, *American Housing Survey*

**Tables:** See tables citing *American Housing Survey* in source notes.

**Universe, Frequency, and Types of Data:** Conducted nationally in the fall in odd numbered years to obtain data on the approximately 103 million occupied or vacant housing units in the United States (group quarters are excluded). Data include characteristics of occupied housing units, vacant units, new housing and mobile home units, financial characteristics, recent mover households, housing and neighborhood quality indicators, and energy characteristics.

**Type of Data Collection Operation:** The national sample was a multistage probability sample with about 51,300 units eligible for interview in 1987. Sample units, selected within 394 PSU's, were surveyed over a 5-month period.

**Data Collection and Imputation Procedures:**

For 1987, the survey was conducted by personal interviews. The interviewers obtained the information from the occupants or, if the unit was vacant, from informed persons such as landlords, rental agents, or knowledgeable neighbors.

**Estimates of Sampling Error:** For the national sample, illustrations of the S.E. of the estimates are provided in the appendix B of the 1987 report. As an example, the estimated CV is about 0.5 percent for the estimated percentage of owner occupied units with two persons.

**Other (nonsampling) Errors:** Response rate was about 97 percent. Nonsampling errors may result from incorrect or incomplete responses, errors in coding and recording, and processing errors. For the 1985 national sample, approximately 6 percent of the total housing inventory was not adequately represented by the AHS sample.

**Sources of Additional Material:** U.S. Bureau of the Census, *Current Housing Reports*, series H-150 and H-170, *American Housing Survey*.

(See section 1 above for information pertaining to the *Census of Population*, section 15 pertaining to table 1202, and section 19 for table 1232.)

## SECTION 27. MANUFACTURES

**Source and Title:** U.S. Bureau of the Census, *Census of Manufactures*

**Tables:** See tables citing *Census of Manufactures* in source notes in section 27 and also table 897 in section 18 and table 1356 in section 30.

**Universe, Frequency, and Types of Data:** Conducted every 5 years to obtain information on labor materials, capital input and output characteristics, plant location, and legal form of organization for all plants in the United States with one or more employees. Universe was 350,000 manufacturing establishments in 1987.

**Type of Data Collection Operation:** Complete enumeration of data items obtained from 200,000 firms. Administrative records from Internal Revenue Service and Social Security Administration are used for 150,000 smaller single-location firms, which were determined by various cutoffs based on size and industry.

**Data Collection and Imputation Procedures:** Five mail and telephone followups for larger nonrespondents. Data for small single-location firms (generally those with fewer than 10 employees) not mailed census questionnaires were estimated from administrative records of IRS and SSA. Data for nonrespondents were imputed from related responses or administrative

records from IRS and SSA. Approximately 8 percent of total value of shipments was represented by fully imputed records in 1987.

**Estimates of Sampling Error:** Not applicable.

**Other (nonsampling) Errors:** Based on evaluation studies, estimates of nonsampling errors for 1972 were about 1.3 percent for estimated total payroll; 2 percent for total employment; and 1 percent for value of shipments. Estimates for later years are not available.

**Sources of Additional Material:** U.S. Bureau of the Census, *1987 Census of Manufactures, Industry Series, Geographic Area Series, and Subject Series*.

**Source and Title:** U.S. Bureau of the Census, *Annual Survey of Manufactures*

**Tables:** See tables citing *Annual Survey of Manufactures* in source notes.

**Universe, Frequency, and Types of Data:** Conducted annually to provide basic measures of manufacturing activity for inter-censal years for all manufacturing establishments having one or more paid employees.

**Type of Data Collection Operation:** Sampling frame is 350,000 establishments in the 1987 Census of Manufactures (see above), supplemented by Social Security Administration lists of new manufacturers and new manufacturing establishments of multi-establishment companies identified annually by the Census Bureau's Company Organization Survey. A probability sample of 66,000 establishments is selected. All establishments of companies with more than \$500 million of manufacturing shipments in 1987 are included with certainty. All establishments with 250+ employees are also included with certainty along with a probability sample of smaller establishments.

**Data Collection and Imputation Procedures:** Survey is conducted by mail with phone and mail followups of nonrespondents. Imputation (for all nonresponse items) is based on previous year reports, or for new establishments in survey, on industry averages.

**Estimates of Sampling Error:** Estimated CV's for number of employees, new expenditure, and for value added totals are given in annual publications. For U.S. level industry statistics, most estimated CV's are 2 percent or less, but vary considerably for detailed characteristics.

**Other (nonsampling) Errors:** Response rate is about 85 percent. Nonsampling errors include those due to collection, reporting, and transcription errors, many of which are corrected through computer and clerical checks.

**Sources of Additional Material:** U.S. Bureau of the Census, *Annual Survey of Manufactures*, and Technical Paper 24.

## SECTION 28. DOMESTIC TRADE AND SERVICES

**Source and Title:** U.S. Bureau of the Census, *Census of Wholesale Trade, Census of Retail Trade, Census of Service Industries*

**Tables:** See tables citing the above censuses in source notes in section 28 and table 1356 in section 30.

**Universe, Frequency, and Types of Data:**

Conducted every 5 years to obtain data on number of establishments, number of employees, total payroll size, total sales, and other industry-specific statistics. In 1982, universe was all employer establishments primarily engaged in wholesale trade, and employer and nonemployer establishments in retail trade or service industries. Currently for 1987, data are available for establishments with payroll for retail trade, wholesale trade, and services.

**Type of Data Collection Operation:** All wholesale firms with paid employees surveyed; all retail and service large employer firms surveyed (i.e. all employer firms above the payroll size cutoff established to separate large from small employers) plus a 10-percent sample of smaller employer firms. Firms with no employees were not required to file a census return.

**Data Collection and Imputation Procedures:** Mail questionnaire is utilized with both mail and telephone followups for nonrespondents. Data for nonrespondents and "nonselected" small employer firms in retail trade and service industries are obtained from administrative records of IRS and the Social Security Administration.

**Estimates of Sampling Error:** Not applicable.

**Other (nonsampling) Errors:** Response rate in 1987 of 80 percent for single establishment firms; 83 percent for multi-establishment firms. Item response ranged from 60 percent to 90 percent with higher rates for less detailed questions.

**Sources of Additional Material:** U.S. Bureau of the Census, appendix A of *Census of Retail Trade; Census of Service Industries; Census of Wholesale Trade; and History of the 1982 Economic Censuses*, February 1987.

**Source and Title:** U.S. Bureau of the Census, *Current Business Surveys*

**Tables:** 1286-1289, 1303, 1310, 1311, and table 988 in section 21.

**Universe, Frequency, and Types of Data:**

Provides monthly estimates of retail sales by kind of business and geographic area, and end-of-month inventories of retail stores; wholesale sales and end-of-month inventories; and annual receipts of selected service industries.

**Type of Data Collection Operation:** Probability sample of all firms from a list frame and, additionally, for retail and service an area frame. The list frame is the Bureau's Standard Statistical Establishment List (SSEL) updated quarterly for recent birth Employer Identification (EI) Numbers issued by the Internal Revenue Service and assigned a kind-of-business code by the Social Security Administration. The largest firms are included monthly; a sample of others is included every 3 months on a rotating basis. The area frame covers businesses not subjected to sampling on the list frame.

**Data Collection and Imputation Procedures:** Data are collected by mail questionnaire with telephone followups for nonrespondents. Imputation made for each nonresponse item and each item failing edit checks.

**Estimates of Sampling Error:** For the 1989 monthly surveys, CV's are about 0.6 percent for estimated total retail sales, 1.7 percent for wholesale sales, 1.3 percent for wholesale inventories. For dollar volume of receipts, CV's from the *Service Annual Survey* vary by kind of business and range between 1.5 percent to 15.0 percent. Sampling errors are shown in monthly publications.

**Other (nonsampling) Errors:** Imputation rates are about 18 percent to 23 percent for monthly retail sales, 20 percent to 25 percent for wholesale sales, about 25 percent to 30 percent for monthly wholesale inventories and 14 percent for the *Service Annual Survey*.

**Sources of Additional Material:** U.S. Bureau of the Census, *Current Business Reports, Monthly Retail Trade, Monthly Wholesale Trade, and Service Annual Survey*.

## SECTION 30. OUTLYING AREAS

(See section 1 for information pertaining to tables 1343 and 1344, section 2 for table 1345, section 22 for table 1354, section 27 for table 1356.)

# Index to Tables Having Historical Statistics, Colonial Times to 1970 Series

[The most recent historical supplement to the *Statistical Abstract* is the bicentennial edition, *Historical Statistics of the United States, Colonial Times to 1970* (see inside back cover). Listed below are statistical time series (identified by number) appearing in this edition, for which tables in the *Statistical Abstract* present comparable figures. Historical series are listed only where related or comparable data are available for one or more years later than 1970. In a few instances, it may be necessary to combine figures shown in the *Abstract* to obtain totals comparable to the series shown in *Historical Statistics*]

# Tables Deleted From the 1991 Edition of the Statistical Abstract

1991  
table  
number

## Sec. 1. POPULATION

- 11 Total Population, by Race: 1960 to 1989
- 15 Projections of the Hispanic Population, by Age and Sex: 1995 to 2025
- 16 Projections of Total Population, by Race: 1991 to 2025
- 17 Projected Components of Population Change, by Race: 1995 to 2025
- 18 Projections of the Total Population by Age, Sex, and Race: 1995 to 2010
- 29 State Population Projections: 1995 and 2000
- 30 Population Projection, by Age—States: 2000
- 31 White and Black Population Projections, by State: 2000
- 57 Households, by Type—Projections: 1995 and 2000
- 79 Religious Congregations—Summary: 1986

## Sec. 2. VITAL STATISTICS

- 87 Projected Fertility Rates, by Race and Age Group: 1990 to 2010
- 97 Childless Women and Children Ever Born, by Age of Woman: 1980 to 1988
- 98 Children Ever Born to Single Women, by Age and Race of Woman: 1980 and 1988
- 127 Deaths—Life Years Lost and Mortality Costs, by Age, Sex, and Cause: 1985
- 132 Marriages—Age Differences of Bride and Groom, by Age: 1987

## Sec. 3. HEALTH AND NUTRITION

- 156 Persons With Health Insurance Protection, by Type of Insurer: 1960 to 1988
- 163 Physicians' Median Earnings From Practice: 1975 to 1988
- 172 Hospitals—Selected Financial Measures: 1980 to 1988
- 196 Persons With Activity Limitation, by Selected Chronic Conditions: 1985
- 197 Persons Needing Assistance With Activities, by Type of Activity, Age and Sex: 1986
- 212 Nutrient Intakes of Persons as Percent of the 1980 Recommended Dietary Allowances (RDA): 1987-88
- 213 Food Energy for Individuals, by Source and Selected Characteristic: 1987-88

## Sec. 4. EDUCATION

- 225 Years of School Completed, by Age, Race, and Hispanic Origin: 1989
- 227 Years of School Completed, by Race and Hispanic Origin—States: 1989
- 228 School Days Lost Associated With Acute Conditions: 1962 to 1988
- 260 High School Graduates by Sex and Control and General Educational Development (GED) Certificates Issued, by Age: 1960 to 1989
- 271 General Education Graduation Requirements in Colleges and Universities: 1984 and 1989
- 274 Undergraduate Students Receiving Financial Aid, by Source of Aid, Control, and Level of Institution: 1986-87
- 275 Postbaccalaureate Students Receiving Financial Aid by Source of Aid, Level of Study, and Control of Institution: 1986-87
- 281 Institutions of Higher Education—Tenure Status of Full-Time Faculty, by Type of Institution and Rank of Faculty: 1988
- 290 College and University Libraries—Summary: 1985

## Sec. 5. LAW ENFORCEMENT

- 301 Crimes Against the Elderly—Number and Rate, by Type: 1973 to 1988
- 336 State Prison Inmates, by Criminal History and Selected Characteristics of the Inmate: 1986
- 339 Average Time Served by Prisoners Released From Federal Institutions for First Time, 1970 to 1986, and by Offense, 1986

1991  
table  
number

## Sec. 6. GEOGRAPHY AND ENVIRONMENT

370 New Capital Business Expenditures for Pollution Abatement: 1975 to 1987

## Sec. 7. PARKS AND RECREATION

387 National Park System—Type of Area: 1988

388 Selected National Park Service Areas—Acreage, 1988, and Visits and Overnight Stays, 1986 to 1988

399 Floral and Nursery Products—Grower Cash Receipts, Imports, and Consumption: 1987 to 1989

408 Merchandise Lines—Establishments and Sales, by Kind of Business: 1987

409 Amusement and Recreation Services—Summary: 1987

415 Annual Travel Expenditures of Consumer Units, by Age of Householder: 1987

422 Air Travel Between the United States and Foreign Countries: 1980 to 1989

## Sec. 8. ELECTIONS

430 Votes Cast in Presidential Preference Primaries, by Party and Leading Candidates: 1988

455 Presidential Primaries—Votes Cast and Percent of Voting-Age Population Casting Votes, by Party: 1988

## Sec. 9. STATE AND LOCAL GOVERNMENT FINANCES AND EMPLOYMENT

476 State and Local Governments—Revenue, Expenditure, and Debt, 1970 to 1988, and by State, 1988

## Sec. 10. FEDERAL GOVERNMENT

512 Executive Controllability of Federal Budget Outlays: 1970 to 1989

537 Federal Paid Civilian Employment, by Agency: 1970 to 1989

## Sec. 11. NATIONAL DEFENSE

544 National Defense—Military Budget Authority, by Major Mission: 1975 to 1989

556 Active Duty Military Personnel—U.S./Soviet Union Summary: 1980 to 1989

559 Military Personnel on Active Duty, by Service: 1975 to 1989

575 Veterans Benefits—Expenditures, by War: 1940 to 1988

## Sec. 12. SOCIAL INSURANCE AND HUMAN SERVICES

588 Social Insurance and Related Programs—Cash Beneficiaries and Benefits, by Program: 1980 to 1988

619 Property Settlement Following Divorce—Selected Characteristics of Women: 1979 and 1988

621 Women, 20 to 54 Years Old, Who Have Ever Adopted a Child, by Relationship Before the Adoption: 1987

622 Weekly Child Care Expenditures: 1987

## Sec. 13. LABOR FORCE, EMPLOYMENT, AND EARNINGS

650 Workers on Flexible Schedules, by Selected Characteristics: 1989

654 Occupational Tenure, by Occupation: 1987

655 Occupation of Employed Civilians, by Sex and Educational Attainment: 1989

687 Establishments Providing Child Care Benefits and/or Varied Work-Schedule Policies, by Establishment Size and Sector: 1987

## Sec. 14. INCOME, EXPENDITURES, AND WEALTH

706 Personal Consumption Expenditures, by Type of Expenditure in Current Dollars: 1980 to 1989

707 Personal Consumption Expenditures, by Type of Product in Constant (1982) Dollars: 1980 to 1989

714 Total and Per Capita Personal Income in Constant (1982) Dollars, 1979 and 1988; and Projections: 1995 to 2000

726 Money Income of Households—Mean After-Tax Household Income in Constant (1987) Dollars, by Selected Characteristics: 1980 to 1987

727 Number of Households Paying Taxes and Amount of Taxes, by Type of Tax and Before-Tax Money Income: 1987

1991  
table  
number

- 728 Households with Discretionary Income—Selected Income Measures: 1986
- 739 Mean Earnings of Husbands and Wives in Married-Couple Families: 1981 and 1987
- 741 Married-Couple Families With Earnings: Occupation of Longest Job in 1987 of Husband and Wife
- 759 Household Net Worth—Ownership, Median Value of Asset Holdings, and Distribution of Net Worth, by Asset Type: 1984 and 1988
- 760 Household Net Worth—Percent Distribution, by Selected Characteristics: 1988
- 761 Top Wealthholders With Net Worth Under \$10,000,000 and Gross Assets of \$500,000 or More, by State of Residence: 1986

#### Sec. 15. **PRICES**

- 779 Implicit Price Deflators and Fixed-Weighted Price Indexes: 1970 to 1989
- 785 Food Prices—Farm Value and Retail Price for Selected Items: 1980 to 1989
- 788 Average Price of Energy in Selected Metropolitan Areas: 1990
- 789 Average Monthly Residential, Commercial, and Industrial Bills for Electricity: 1980 to 1988
- 790 Net Monthly Residential Electric Bills (Lowest and Highest) for 500 Kilowatt-Hours Use, 1970 to 1988, and by State, 1988

#### Sec. 16. **BANKING, FINANCE, AND INSURANCE**

- 799 Flow of Funds Accounts—Assets and Liabilities of Private Nonbank Financial Institutions, by Type of Instrument: 1989
- 803 FDIC-Insured Banks—Number, Banking Offices, and Deposits, by Bank Class: 1989
- 813 Foreign Branches of U.S. Federal Reserve Member Banks—Number and Assets: 1970 to 1989
- 818 Savings Institutions (SAIF-Insured)—Sources and Uses of Funds: 1980 to 1989
- 823 Holdings of Construction, Long-Term Mortgage, and Land Loans, by Type of Loan, 1970 to 1989, and by Lender, 1989
- 826 Purchases and Sales of Mortgage Loans, by Lender: 1970 to 1989
- 843 United States Purchases and Sales of Foreign Stocks and Bonds, 1980 to 1989, and by Selected Country, 1988 and 1989
- 852 U.S. Life Insurance Companies—New Long-Term Investments: 1970 to 1989
- 856 Private Health Insurance Organizations—Income and Expenses: 1970 to 1987

#### Sec. 17. **BUSINESS ENTERPRISE**

- 875 Black-Owned Firms—Major Industry Statistics: 1982 and 1987
- 876 Women-Owned and Black-Owned Firms—Number, Receipts, and Employees for 10 Largest Metropolitan Areas: 1987
- 878 Black-Owned Firms—Number and Receipts, by State: 1982 and 1987
- 879 Drug Testing and Employee Assistance Programs, by Size of Establishment and Industry: 1988
- 880 Consumer and Farmer Cooperatives, by Type of Association: 1985 to 1988
- 886 Small Business Birth, Death, and Net Growth Rates: 1980 to 1988

#### Sec. 18. **COMMUNICATIONS**

- 924 REA and Rural Telephone Bank Program—Summary: 1970 to 1989
- 930 Radio and Television Stations Owned by Newspapers and/or Magazines: 1961 to 1989

#### Sec. 19. **ENERGY**

- 955 Average Residential Energy Consumption and Expenditures of All Fuels Used, by Main Heating Fuel Type and Household Characteristic: 1987
- 975 Electric Utility Generating Units and Nameplate Capacity, by Prime Mover: 1970 to 1987

#### Sec. 20. **SCIENCE AND TECHNOLOGY**

- 1005 Estimated Characteristics of Employed Scientists and Engineers: 1988

#### Sec. 21. **TRANSPORTATION—LAND**

- 1049 Seat Belt Usage—Young Child Survivors and Fatalities: 1985 to 1989

#### Sec. 22. **TRANSPORTATION—AIR AND WATER**

- 1089 Water Transportation Industry—Summary: 1987

#### Sec. 23. **AGRICULTURE**

- 1116 Corporate Farms—Characteristics, by Type: 1987
- 1117 Individual and Family Farms—Selected Characteristics: 1987
- 1118 Farms—Number, Acreage, and Value of Sales, by Size of Sales: 1987

1991  
table  
number

- 1119 Farms—Number, Acreage, and Value of Sales, by Type of Farm: 1987
- 1125 Indicators of Financial Stress in Agriculture, 1980 to 1989, and by Farm Region, 1989
- 1133 Farms Receiving Government Payments or Commodity Credit Corporation Loans: 1987
- 1143 Corn, Wheat, and Soybean Acreage Treated With Agrichemicals, by Type: 1971 to 1989
- 1144 Agricultural Chemicals Used on Farms: 1982 and 1987
- 1147 Selected Farm Products—Production and Exports: 1970 to 1990
- 1153 Agricultural Exports—Estimated Value, by Leading States: 1989
- 1157 Price Support Operations—Selected Commodities: 1985 to 1989

#### Sec. 25. MINING AND MINERAL PRODUCTS

- 1238 Asbestos: 1984 to 1989
- 1239 Cement, Sand, Gravel, Stone, Gypsum, Lime, and Phosphate Rock: 1970 to 1988
- 1240 Potash—Summary: 1970 to 1988
- 1241 Iron Ore—Summary: 1980 to 1989
- 1242 Gold and Silver—Summary: 1980 to 1989
- 1243 Lead—Summary: 1980 to 1989
- 1244 Copper—Summary: 1980 to 1989
- 1246 Nickel—Summary: 1980 to 1989
- 1252 Aluminum—Summary: 1980 to 1989
- 1253 Magnesium—Summary: 1980 to 1989
- 1257 Ferroalloys—Summary: 1980 to 1989
- 1258 Berylliums—Summary: 1980 to 1989

#### Sec. 26. CONSTRUCTION AND HOUSING

- 1282 Housing Units—Size of Units and Lot: 1987
- 1284 Housing Units—Selected Characteristics, by State: 1990
- 1285 Occupied Housing Units—Tenure, by Selected Characteristics of the Unit and Householder: 1987
- 1286 Occupied Housing Units—Housing Value and Gross Rent: 1987
- 1287 Occupied Housing Units—Financial Summary, by Selected Characteristics of the Householder and Tenure: 1987
- 1290 Occupied Housing Units—Housing Indicators, by Selected Characteristics of the Householder and Tenure: 1987
- 1291 Owner Occupied Housing Units—Home Improvements and Repairs, by Selected Characteristics of the Householder: 1987

#### Sec. 27. MANUFACTURES

- 1319 Beverage Industry—Summary: 1970 to 1988
- 1321 Food Manufacturing Industry—Summary: 1970 to 1989
- 1323 Mill Consumption of Natural Fibers: 1970 to 1989
- 1326 Male and Female Clothing—Production: 1980 to 1988
- 1327 Nonrubber Footwear—Summary: 1970 to 1988
- 1328 Chemicals and Allied Products—Industry Summary: 1972 to 1988
- 1329 Rubber—New Supply, Distribution, and Stocks: 1970 to 1988
- 1331 Mill and Foundry Products—Shipments: 1980 to 1989
- 1332 Net Shipments of Titanium Mill Products: 1980 to 1988
- 1344 Electric and Electronic Equipment—Industry Summary: 1982 to 1988
- 1345 Electronic Computing Equipment Industry—Summary: 1988
- 1346 Electronic Components and Accessories Industry—Summary: 1977 to 1988

#### Sec. 28. DOMESTIC TRADE AND SERVICES

- 1354 Largest Retailing Companies—Sales, Net income, Assets, and Employees, by Sales Group: 1980 to 1989
- 1382 Computer Programming and Data Processing—Summary, by Kind of Business: 1982 and 1987

#### Sec. 29. FOREIGN COMMERCE AND AID

- 1403 U.S. Domestic Exports and General Imports of Selected Commodities—Value, by Area: 1989
- 1407 U.S. Exports and Imports—Indexes of Unit Value and Quantity: 1984 to 1988
- 1408 Domestic Exports, by Selected Commodity Groups: 1970 to 1989
- 1409 General Imports, by Selected Commodity Groups: 1970 to 1989

1991  
table  
number

**Sec. 30. OUTLYING AREAS**

- 1425 Puerto Rico—Wholesale and Retail Trade Summary: 1987
- 1426 Puerto Rico—Service Industries Summary: 1987
- 1427 Puerto Rico—Manufactures, by Industry: 1982 and 1987
- 1428 Puerto Rico—Construction Summary: 1982 and 1987

**Sec. 31. COMPARATIVE INTERNATIONAL STATISTICS**

- 1444 Enrollment and Expenditures for K-12 and Higher Education: 1985
- 1455 Percentage of Population Served by Waste Water Treatment Plants—Selected Countries: 1970 to 1987

# Appendix VI

## New Tables

Table number		Page number
	<b>Sec. 1. POPULATION</b> .....	1
16	Resident Population, by Race, and Hispanic Origin: 1980 and 1990 .....	17
17	Resident Population, by Age, Race and Hispanic Origin—Percent Distribution: 1980 and 1990 .....	17
24	Resident Population, by Region, Race, and Hispanic Origin: 1990 .....	21
28	Urban and Rural Population, Housing Units, and Land Area: 1970 to 1990 .....	27
29	Urban and Rural Population—States: 1990 .....	27
43	American Indian, Eskimo, or Aleut Population—Population Living Inside and Outside Identified Areas, and Households, by Type: 1990 .....	40
61	Households, by Type—60 Largest Metropolitan Areas: 1990 .....	50
	<b>Sec. 2. VITAL STATISTICS</b> .....	61
94	Childless Women and Children Ever Born, by Race, Age, and Marital Status: 1990 . . .	71
95	Ability to Bear Children, Women 15 to 44 Years Old, by Age and Number of Prior Births: 1982 to 1988 .....	72
99	Family Planning Visits—Number of Women: 1982 and 1988 .....	73
116	Deaths, by Age and Leading Cause: 1989 .....	84
126	Firearm Mortality Among Children, Youth, and Young Adults, 1 to 34 Years Old: 1988 .	90
131	First Marriage Dissolution and Years Until Remarriage for Women, by Race and Hispanic Origin: 1988 .....	92
	<b>Sec. 3. HEALTH AND NUTRITION</b> .....	94
155	Persons Without Health Insurance Coverage, by Selected Characteristic: 1989 .....	106
157	Children—Health Insurance and Medical Care: 1988 .....	107
163	Physician Contacts, by Place of Contact and Selected Patient Characteristic: 1984 and 1989 .....	110
175	Surgery Performed in Hospitals: 1980 to 1990 .....	116
	<b>Sec. 4. EDUCATION</b> .....	135
221	Years of School Completed, by Selected Characteristic: 1991 .....	144
223	Highest Degree Earned, by Selected Characteristic: 1987 .....	145
248	Private Elementary and Secondary Schools—Enrollment Size and Minority Enrollment, by Orientation: 1988.* .....	158
252	High School Dropouts, by Race and Hispanic Origin: 1973 to 1990 .....	160
257	General Educational Development (GED) Credentials Issued, by Age: 1974 to 1989 . . .	162
272	Institutions of Higher Education—Tenure Status of Full-Time Faculty, by Type and Control of Institution and Rank and Sex of Faculty: 1990 .....	170
274	Freshman Enrollment in Remedial Courses, by Institutional Characteristic: 1989 .....	171
285	College and University Libraries—Summary: 1975 to 1988 .....	176
	<b>Sec. 5. LAW ENFORCEMENT, COURTS, AND PRISONS</b> .....	177
298	Weapons Used in Crime Incidents by Armed Offenders, by Type of Weapon and Crime: 1990 .....	185
	<b>Sec. 6. GEOGRAPHY AND ENVIRONMENT</b> .....	202
358	State and Local Government Expenditures for Solid Waste Management and Sewerage, by State: 1990 Sewerage, by State: 1990 .....	215
	<b>Sec. 8. ELECTIONS</b> .....	248
417	Apportionment of Membership in House of Representatives, by State: 1790 to 1990 . . .	255
	<b>Sec. 9. STATE AND LOCAL GOVERNMENT FINANCES AND EMPLOYMENT</b> .....	276
465	State Fiscal Capacity and Effort: 1988 .....	292

Table number		Page number
	<b>Sec. 10. FEDERAL GOVERNMENT FINANCES AND EMPLOYMENT</b> . . . . .	311
494	Federal Budget Outlays—Defense, Human and Physical Resources, and Net Interest Payments: 1940 to 1992 . . . . .	317
504	Government-Sponsored Enterprise Securities and Guarantees Outstanding: 1970 to 1990 . . . . .	323
	<b>Sec. 11. NATIONAL DEFENSE AND VETERANS AFFAIRS</b> . . . . .	334
529	Military and Civilian Personnel and Expenditures: 1985 to 1990 . . . . .	337
	<b>Sec. 12. SOCIAL INSURANCE AND HUMAN SERVICES</b> . . . . .	350
564	Cash and Noncash Benefits for Persons With Limited Income—Average Monthly Recipients: 1985 to 1990 . . . . .	356
	<b>Sec. 13. LABOR FORCE, EMPLOYMENT, AND EARNINGS</b> . . . . .	377
627	Job Accessions, by Selected Characteristics: 1987 to 1989 . . . . .	391
634	High Technology Employment and Average Pay, by Industry: 1989 . . . . .	398
	<b>Sec. 14. INCOME, EXPENDITURES, AND WEALTH</b> . . . . .	423
681	Personal Consumption Expenditures, by Type of Expenditure in Current and Constant (1987) Dollars: 1970 to 1990 . . . . .	433
685	Gross State Product, by Industry: 1989 . . . . .	436
700	Money Income of Households—Percent Distribution, by Income Quintile and Top 5 Percent for Selected Characteristics: 1990 . . . . .	448
701	Median Income of Households, by State, in Constant (1990) Dollars: 1984 to 1990 . . . . .	448
705	Money Income of Families—Percent Distribution by Income Quintile and Top 5 Percent for Selected Characteristics: 1990 . . . . .	450
723	Percent of Persons Below Poverty Level, by State: 1984 to 1990 . . . . .	458
732	Family Net Worth—Mean and Median of Net Worth, by Selected Characteristic: 1983 and 1989 . . . . .	462
733	Family Net Worth—Percent of Families Owning Selected Nonfinancial Assets, by Selected Characteristics: 1983 and 1989 . . . . .	463
734	Family Net Worth—Composition of Assets and Debts of all Families: 1983 and 1989 . . . . .	463
	<b>Sec. 15. PRICES</b> . . . . .	465
750	Fixed-Weighted Price Indexes for Personal Consumption Expenditures: 1960 to 1991 . . . . .	480
752	Fixed-Weighted Price Indexes: 1980 to 1991 . . . . .	481
	<b>Sec. 16. BANKING, FINANCE, AND INSURANCE</b> . . . . .	487
768	Financial Assets Held by Families—Ownership and Median Value: 1983 and 1989 . . . . .	493
769	Financial Debts Held by Families, by Type of Debt: 1983 and 1989 . . . . .	493
795	Consumer Credit—Installment Credit Finance Rates: 1980 to 1991 . . . . .	503
799	Use of Financial Services by Households, by Type of Financial Institution: 1989 . . . . .	505
800	Use of Financial Services by Households, by Type of Account and Locality of Institution: 1989 . . . . .	505
801	Percent of Households Using Financial Accounts, by Type of Account and Source: 1989 . . . . .	505
	<b>Sec. 17. BUSINESS ENTERPRISE</b> . . . . .	516
842	Women- and Minority-Owned Firms, by Selected Metropolitan Areas: 1987 . . . . .	528
843	Minority-Owned Firms—Major Industry Statistics: 1987 . . . . .	528
844	Minority-Owned Firms, by State: 1987 . . . . .	529
848	Bankruptcy Petitions Filed, by State: 1981 to 1991 . . . . .	531
851	Job Creation, by Firm Size and Industry: 1976 to 1990 . . . . .	532
	<b>Sec. 18. COMMUNICATIONS</b> . . . . .	546
887	Telephone Communications—Operating Revenue and Expenses: 1989 and 1990 . . . . .	552
889	Cellular Telephone Industry: 1984 to 1991 . . . . .	553
891	Radio and Television Broadcasting Services—Operating Revenue and Expenses: 1989 and 1990 . . . . .	554
896	Cable and Other Pay Television Services—Operating Revenue: 1989 and 1990 . . . . .	556
	<b>Sec. 19. ENERGY</b> . . . . .	561
922	Manufacturing Energy Consumption, by Type of Fuel and Industry: 1988 . . . . .	568
952	Renewable Energy Consumption Estimates, by Type: 1988 to 1990 . . . . .	581

Table number		Page number
	<b>Sec. 20. SCIENCE AND TECHNOLOGY</b> .....	583
971	Science and Engineering Degree Recipients in 1988 and 1989—Selected Characteristics: 1990 .....	592
	<b>Sec. 21. TRANSPORTATION—LAND</b> .....	597
1012	State Legislation—Alcohol and Road Safety Laws: Various Years .....	611
1016	Police Reported Traffic Crashes, by Age Group: 1990 .....	613
	<b>Sec. 22. TRANSPORTATION—AIR AND WATER</b> .....	622
1054	Aerospace Industry—Net Profits After Taxes: 1976 to 1991 .....	631
	<b>Sec. 23. AGRICULTURE</b> .....	638
1076	Farm Operator Off-Farm Employment, by Age of Operator: 1988 .....	643
	<b>Sec. 25. MINING AND MINERAL PRODUCTION</b> .....	684
1199	Diamond, Industrial—Summary: 1985 to 1991 .....	702
1200	Manganese Compounds—Summary: 1985 to 1991 .....	702
	<b>Sec. 26. CONSTRUCTION AND HOUSING</b> .....	703
1223	Housing Units—Selected Characteristics, by State: 1990 .....	715
1225	Occupied Housing Units—Tenure, by Race and Hispanic Origin of Householder: 1980 and 1990 .....	716
1226	Occupied Housing Units—Tenure, by Age of Householder: 1980 and 1990 .....	716
1227	Occupied Housing Units—Housing Value and Contract Rent, by Region: 1990 .....	717
1228	Occupied Housing Units—Housing Value and Contract Rent, by State: 1990 .....	718
1229	Occupied Housing Units—Housing Value and Contract Rent in Constant (1990) Dollars, by State: 1970 to 1990 .....	720
	<b>Sec. 27. MANUFACTURES</b> .....	728
1245	Manufactures—Summary by Industry Group: 1982, 1987, and 1990 .....	738
	<b>Sec. 29. FOREIGN COMMERCE AND AID</b> .....	779
1334	U.S. Domestic Exports and General Imports of Selected Commodities—Value, by Area: 1990 .....	798
1336	Domestic Exports and General Imports, by Selected Commodity Groups: 1989 to 1991 .....	804
	<b>Sec. 30. OUTLYING AREAS</b> .....	807
1351	Puerto Rico—Net Income, by Industrial Origin: 1980 to 1991 .....	813
1352	Puerto Rico—Transfers Between Federal and State Governments and Other Nonresidents: 1980 to 1991 .....	813
	<b>Sec. 31. COMPARATIVE INTERNATIONAL STATISTICS</b> .....	816
1369	Proficiency Test Scores in Mathematics and Science for 13-Year-Old Students, by Selected Countries: 1991 .....	830

## Statistical Abstract and Supplements

---

*Statistical Abstract of the United States.* Since 1878, the authoritative summary of statistics on the social, political, and economic organization of the United States. Includes a representative selection of statistics widely used by public officials, business analysts, educators, librarians, research workers, and students. Price \$34 (clothbound); \$29 (paperbound). GPO stock numbers: 003-024-08160-1 (clothbound); 003-024-08159-8 (paperbound). NTIS stock numbers: PB91-190827 (clothbound); PB91-213124 (paperbound).

*State and Metropolitan Area Data Book, 1991.* This volume, the fourth in a series, presents a vast array of data items for metropolitan areas; component counties of metro areas; central cities of metro areas; and the United States, the 50 States and the District of Columbia, and census regions and divisions. Also featured are State and metro area ranking tables. Price \$26 (paperbound). GPO stock number: 003-024-07259-9. NTIS stock number: PB91-212639.

*State and Metropolitan Area Data Book, 1992 Update.* This publication features data on population (by age, race, sex, household relationship, etc.) and housing (by tenure, value, etc.) from the 1990 Census of Population and Housing for the areas presented in the 1991 State and Metropolitan Area Data Book. Price and stock number not available at this time; contact Customer Services, Bureau of the Census, for more information.

*County and City Data Book, 1988.* Price \$36 (clothbound). GPO stock number: 003-024-06709-9. Next edition available 1993.

*Historical Statistics of the United States, Colonial Times to 1970.* A two-part compendium of more than 12,500 statistical time series, largely annual, on American social, economic, political, and geographic development, covering periods from 1610 to 1970. Price \$56 (clothbound). GPO stock number: 003-024-00120-0.

**Orders may be mailed to:** Superintendent of Documents, U.S. Government Printing Office (GPO), Washington, DC 20402. Payment must accompany order. To order or verify prices, call 202-783-3238. To FAX orders or inquiries, dial 202-275-0019. Publications are also available in Government Printing Office bookstores located in major cities. *The Statistical Abstract* and the *State and Metropolitan Area Data Book* may also be ordered from the National Technical Information Service (NTIS). To order or inquire about special delivery options, call 703-487-4650.

---

## Machine-Readable Products

*State and Metropolitan Area Data Book, 1991*—Files on diskettes. Major tables of this publication on diskettes. Provides over 1,600 data items for States, 224 for metropolitan areas, 89 for metropolitan counties, and 13 for central cities. Price varies.

*County and City Data Book, 1988*—Files in three formats: tape, diskettes, and compact disc.

County Statistics File 4—Files on Tape (CO-STAT 4). Includes over 2,000 data items for the United States, 50 States, the District of Columbia, and 3,141 counties or county equivalents.

USA Counties on compact disc is a CD-ROM version of CO-STAT 4. Price \$150.

*Statistical Abstract* on CD-ROM. Price \$50. For availability, call 301-763-5299.

---

**Orders may be mailed to:** Customer Services, U.S. Bureau of the Census, Washington, DC 20233. Payment must accompany order. To order or obtain prices, call 301-763-4100. To FAX orders or inquiries, dial 301-763-4794.

---

112th Edition

*The official  
**National Data Book  
and Guide to Sources**  
is the one reference book  
to have in your home,  
office, school, or library.*

---

**Use this book to . . .**

☆ **Save research time and money**

- In one volume an extensive collection of statistics on social, economic, and political subjects from over 200 sources
- Source notes for each table and a guide to statistical publications for more information
- Comprehensive index

---

☆ **Simplify your 1990 census data search**

- Social and economic highlights
- Results for States, cities, and metro areas

---

☆ **Get the data behind today's headlines**

Tables provide the answers to questions like:

- Which States have the highest family income?
- What is the highest temperature on record for Juneau, Alaska?
- What will be the fastest growing occupations until the year 2000?

---

☆ **Obtain data you can trust**

The best-selling and longest running Federal statistical publication.  
Quoted and used by experts in every field.

---
